GRADE 9 SOCIAL STUDIES – LESSON PLAN 1

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 2	WEEK: 1	LESSON: 1	TIME: 40 minutes | ROLL: _____

Strand: 1.0 Social Studies and Career Development

Sub-strand: 1.1 Pathway Choices

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify factors to consider when selecting a pathway at Senior School. Skills: Select a possible track within the Social Sciences pathway based on interests and abilities. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: Why is it important to learn about career pathways?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “1.1 Pathway Choices”. They share prior knowledge and consider: Why is it important to learn about career pathways?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to observe maps, pictures, artefacts or examples; identify key features; discuss prior knowledge in pairs; and record findings. The learner is guided to brainstorm the meaning of a career pathway; discuss factors to consider when selecting a pathway; use print or digital resources to examine Social Sciences pathway requirements; create and display pathway charts; reflect on a possible track.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: Why is it important to learn about career pathways? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 2

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 2	WEEK: 1	LESSON: 2	TIME: 40 minutes | ROLL: _____

Strand: 1.0 Social Studies and Career Development

Sub-strand: 1.1 Pathway Choices

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Examine requirements for the Social Sciences pathway and its tracks. Skills: Select a possible track within the Social Sciences pathway based on interests and abilities. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: Why is it important to learn about career pathways?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “1.1 Pathway Choices”. They share prior knowledge and consider: Why is it important to learn about career pathways?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to read relevant print or digital sources; compare information in groups; interpret evidence; and present conclusions. The learner is guided to brainstorm the meaning of a career pathway; discuss factors to consider when selecting a pathway; use print or digital resources to examine Social Sciences pathway requirements; create and display pathway charts; reflect on a possible track.

Step 1: Learners identify examples from their own experiences and examine relevant print, digital or community sources.

Step 2: Pairs or groups classify information, compare opportunities and challenges, and discuss how context influences people's choices.

Step 3: Learners prepare a chart, concept map, short presentation or evidence-based response to the inquiry question.

Step 4: Learners share findings, listen to different views and suggest practical, respectful actions or informed choices.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: Why is it important to learn about career pathways? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 12

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 2	WEEK: 3	LESSON: 4	TIME: 40 minutes | ROLL: _____

Strand: 2.0 Community Service-Learning

Sub-strand: 2.1 Community Service-Learning Project

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify a community need that can be addressed through a service-learning project. Skills: Evaluate the impact of the project and reflect on responsible citizenship. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How can learners contribute to addressing needs in their community?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to "2.1 Community Service-Learning Project". They share prior knowledge and consider: How can learners contribute to addressing needs in their community?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to apply the learning in a practical or scenario-based task; evaluate ideas using agreed criteria; and reflect on responsible action. The learner is guided to conduct a simple needs assessment; consult relevant community members; agree on a manageable project; develop objectives, roles, resources and timeline; implement activities safely; document evidence; evaluate outcomes and present reflections.

Step 1: Learners examine the selected source or example and identify its main features and key vocabulary.

Step 2: Learners discuss the topic in pairs, record evidence and compare interpretations.

Step 3: Groups complete a source-analysis, mapping, research or problem-solving activity relevant to the sub-strand.

Step 4: Learners present their conclusions and relate the learning to responsible participation in society.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How can learners contribute to addressing needs in their community? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 13

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 2	WEEK: 4	LESSON: 1	TIME: 40 minutes | ROLL: _____

Strand: 2.0 Community Service-Learning

Sub-strand: 2.1 Community Service-Learning Project

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Plan and implement a collaborative project that responds to the identified need. Skills: Evaluate the impact of the project and reflect on responsible citizenship. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How can learners contribute to addressing needs in their community?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “2.1 Community Service-Learning Project”. They share prior knowledge and consider: How can learners contribute to addressing needs in their community?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to observe maps, pictures, artefacts or examples; identify key features; discuss prior knowledge in pairs; and record findings. The learner is guided to conduct a simple needs assessment; consult relevant community members; agree on a manageable project; develop objectives, roles, resources and timeline; implement activities safely; document evidence; evaluate outcomes and present reflections.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How can learners contribute to addressing needs in their community? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 23

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 2	WEEK: 6	LESSON: 3	TIME: 40 minutes | ROLL: _____

Strand: 3.0 People and Relationships

Sub-strand: 3.2 Indigenous Knowledge Systems in African Societies

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify types of indigenous knowledge systems in African societies. Skills: Appreciate and document relevant indigenous knowledge while respecting cultural diversity. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How does indigenous knowledge influence society?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “3.2 Indigenous Knowledge Systems in African Societies”. They share prior knowledge and consider: How does indigenous knowledge influence society?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to observe maps, pictures, artefacts or examples; identify key features; discuss prior knowledge in pairs; and record findings. The learner is guided to brainstorm indigenous knowledge in medicine, agriculture, climate, technology, education, environmental conservation and astronomy; conduct a respectful interview with a knowledgeable community member; compare traditional and contemporary practices; share findings.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How does indigenous knowledge influence society? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 24

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 2	WEEK: 6	LESSON: 4	TIME: 40 minutes | ROLL: _____

Strand: 3.0 People and Relationships

Sub-strand: 3.2 Indigenous Knowledge Systems in African Societies

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Explain how indigenous knowledge contributed to sustainable community life. Skills: Appreciate and document relevant indigenous knowledge while respecting cultural diversity. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How does indigenous knowledge influence society?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “3.2 Indigenous Knowledge Systems in African Societies”. They share prior knowledge and consider: How does indigenous knowledge influence society?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to read relevant print or digital sources; compare information in groups; interpret evidence; and present conclusions. The learner is guided to brainstorm indigenous knowledge in medicine, agriculture, climate, technology, education, environmental conservation and astronomy; conduct a respectful interview with a knowledgeable community member; compare traditional and contemporary practices; share findings.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 34

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 2	WEEK: 9	LESSON: 2	TIME: 40 minutes | ROLL: _____

Strand: 3.0 People and Relationships

Sub-strand: 3.3 Poverty Reduction

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify causes and indicators of poverty in society. Skills: Propose responsible actions that can contribute to poverty reduction in the community. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How can poverty be reduced in society?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “3.3 Poverty Reduction”. They share prior knowledge and consider: How can poverty be reduced in society?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to apply the learning in a practical or scenario-based task; evaluate ideas using agreed criteria; and reflect on responsible action. The learner is guided to analyse age-appropriate case studies; identify causes and effects of poverty; discuss education, skills, enterprise, social support and community initiatives; develop and present a practical poverty-reduction proposal.

Step 1: Learners read short, age-appropriate source extracts or scenarios and identify the rights, responsibilities, institutions or issues involved.

Step 2: In groups, learners discuss different perspectives and distinguish facts, opinions and respectful ways of responding.

Step 3: Learners use a case study, role-play or structured discussion to practise peaceful, inclusive and responsible civic participation.

Step 4: Learners record key conclusions and explain how the principles apply in school, family or community life.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How can poverty be reduced in society? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 35

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 2	WEEK: 9	LESSON: 3	TIME: 40 minutes | ROLL: _____

Strand: 3.0 People and Relationships

Sub-strand: 3.3 Poverty Reduction

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Examine strategies used to reduce poverty. Skills: Propose responsible actions that can contribute to poverty reduction in the community. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How can poverty be reduced in society?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “3.3 Poverty Reduction”. They share prior knowledge and consider: How can poverty be reduced in society?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to observe maps, pictures, artefacts or examples; identify key features; discuss prior knowledge in pairs; and record findings. The learner is guided to analyse age-appropriate case studies; identify causes and effects of poverty; discuss education, skills, enterprise, social support and community initiatives; develop and present a practical poverty-reduction proposal.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How can poverty be reduced in society? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify causes and forms of conflict in society. Skills: Demonstrate communication and negotiation skills in resolving age-appropriate conflict situations. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How can conflicts be resolved peacefully?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “3.5 Peaceful Conflict Resolution”. They share prior knowledge and consider: How can conflicts be resolved peacefully?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to observe maps, pictures, artefacts or examples; identify key features; discuss prior knowledge in pairs; and record findings. The learner is guided to analyse fictional or localised case studies; identify interests and causes; practise active listening, dialogue, negotiation, mediation and compromise through role-play; reflect on peaceful outcomes.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How can conflicts be resolved peacefully? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 46

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 3	WEEK: 2	LESSON: 2	TIME: 40 minutes | ROLL: _____

Strand: 3.0 People and Relationships

Sub-strand: 3.5 Peaceful Conflict Resolution

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Examine peaceful approaches to resolving conflict. Skills: Demonstrate communication and negotiation skills in resolving age-appropriate conflict situations. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How can conflicts be resolved peacefully?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “3.5 Peaceful Conflict Resolution”. They share prior knowledge and consider: How can conflicts be resolved peacefully?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to read relevant print or digital sources; compare information in groups; interpret evidence; and present conclusions. The learner is guided to analyse fictional or localised case studies; identify interests and causes; practise active listening, dialogue, negotiation, mediation and compromise through role-play; reflect on peaceful outcomes.

Step 1: Learners read short, age-appropriate source extracts or scenarios and identify the rights, responsibilities, institutions or issues involved.

Step 2: In groups, learners discuss different perspectives and distinguish facts, opinions and respectful ways of responding.

Step 3: Learners use a case study, role-play or structured discussion to practise peaceful, inclusive and responsible civic participation.

Step 4: Learners record key conclusions and explain how the principles apply in school, family or community life.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How can conflicts be resolved peacefully? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

Learners observe a map, photograph, short source extract, chart or familiar community example connected to "3.6 Healthy Relationships". They share prior knowledge and consider: What makes relationships healthy and respectful?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to apply the learning in a practical or scenario-based task; evaluate ideas using agreed criteria; and reflect on responsible action. The learner is guided to discuss qualities of healthy relationships; distinguish respectful and harmful behaviours in fictional scenarios; practise assertive communication and help-seeking; develop personal guidelines for respectful interaction.

Step 1: Learners read short, age-appropriate source extracts or scenarios and identify the rights, responsibilities, institutions or issues involved.

Step 2: In groups, learners discuss different perspectives and distinguish facts, opinions and respectful ways of responding.

Step 3: Learners use a case study, role-play or structured discussion to practise peaceful, inclusive and responsible civic participation.

Step 4: Learners record key conclusions and explain how the principles apply in school, family or community life.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: What makes relationships healthy and respectful? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 57

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 3	WEEK: 5	LESSON: 1	TIME: 40 minutes | ROLL: _____

Strand: 4.0 Natural and Historic Built Environments

Sub-strand: 4.1 Topographical Maps

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify features and symbols used on topographical maps. Skills: Use a topographical map to describe the distribution of selected features. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How do topographical maps help us understand places?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “4.1 Topographical Maps”. They share prior knowledge and consider: How do topographical maps help us understand places?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to observe maps, pictures, artefacts or examples; identify key features; discuss prior knowledge in pairs; and record findings. The learner is guided to observe map keys and conventional signs; practise direction and grid references; measure distances using map scale; interpret relief and drainage features; answer map-reading tasks individually and in groups.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How do topographical maps help us understand places? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 58

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 3	WEEK: 5	LESSON: 2	TIME: 40 minutes | ROLL: _____

Strand: 4.0 Natural and Historic Built Environments

Sub-strand: 4.1 Topographical Maps

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Interpret direction, scale, grid references and selected physical and human features. Skills: Use a topographical map to describe the distribution of selected features. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How do topographical maps help us understand places?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “4.2 Internal Land Forming Processes”. They share prior knowledge and consider: How do internal processes shape the Earth's surface?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to investigate a case study or local example; organise evidence in a chart, map or timeline; and discuss its significance. The learner is guided to observe diagrams, models or videos; model folding and faulting using safe classroom materials; label features; locate selected examples on maps; explain how internal processes shape the landscape.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How do internal processes shape the Earth's surface? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 68

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 3	WEEK: 7	LESSON: 4	TIME: 40 minutes | ROLL: _____

Strand: 4.0 Natural and Historic Built Environments

Sub-strand: 4.2 Internal Land Forming Processes

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify internal processes that shape the Earth's surface. Skills: Interpret diagrams and examples of landforms associated with internal processes. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How do internal processes shape the Earth's surface?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “4.2 Internal Land Forming Processes”. They share prior knowledge and consider: How do internal processes shape the Earth's surface?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to apply the learning in a practical or scenario-based task; evaluate ideas using agreed criteria; and reflect on responsible action. The learner is guided to observe diagrams, models or videos; model folding and faulting using safe classroom materials; label features; locate selected examples on maps; explain how internal processes shape the landscape.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How do internal processes shape the Earth's surface? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “4.3 Multipurpose River Projects in Africa”. They share prior knowledge and consider: How do multipurpose river projects contribute to development?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to read relevant print or digital sources; compare information in groups; interpret evidence; and present conclusions. The learner is guided to locate selected projects using maps; research purposes such as irrigation, hydroelectric power, water supply and flood control; compare benefits and challenges; discuss environmental and community impacts; present findings.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How do multipurpose river projects contribute to development? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 79

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 3	WEEK: 10	LESSON: 3	TIME: 40 minutes | ROLL: _____

Strand: 4.0 Natural and Historic Built Environments

Sub-strand: 4.3 Multipurpose River Projects in Africa

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify selected multipurpose river projects in Africa. Skills: Evaluate ways of managing river projects sustainably and equitably. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How do multipurpose river projects contribute to development?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “4.3 Multipurpose River Projects in Africa”. They share prior knowledge and consider: How do multipurpose river projects contribute to development?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to investigate a case study or local example; organise evidence in a chart, map or timeline; and discuss its significance. The learner is guided to locate selected projects using maps; research purposes such as irrigation, hydroelectric power, water supply and flood control; compare benefits and challenges; discuss environmental and community impacts; present findings.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “4.5 World Heritage Sites in Africa”. They share prior knowledge and consider: Why is it important to conserve World Heritage Sites?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to investigate a case study or local example; organise evidence in a chart, map or timeline; and discuss its significance. The learner is guided to locate selected sites such as Rock-Hewn Churches, Vallée de Mai, Serengeti National Park, Robben Island and Victoria Falls; research their significance; create information displays; propose conservation measures.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: Why is it important to conserve World Heritage Sites? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 90

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 4	WEEK: 3	LESSON: 2	TIME: 40 minutes | ROLL: _____

Strand: 4.0 Natural and Historic Built Environments

Sub-strand: 4.5 World Heritage Sites in Africa

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify selected World Heritage Sites in Africa. Skills: Propose measures for conserving heritage sites and respecting cultural diversity. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: Why is it important to conserve World Heritage Sites?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “5.1 The Constitution of Kenya”. They share prior knowledge and consider: Why is the Constitution important in governing Kenya?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to apply the learning in a practical or scenario-based task; evaluate ideas using agreed criteria; and reflect on responsible action. The learner is guided to examine selected simplified constitutional extracts; identify national values, structures and principles; discuss the role of the Constitution; analyse fictional civic situations and present reasoned responses.

Step 1: Learners read short, age-appropriate source extracts or scenarios and identify the rights, responsibilities, institutions or issues involved.

Step 2: In groups, learners discuss different perspectives and distinguish facts, opinions and respectful ways of responding.

Step 3: Learners use a case study, role-play or structured discussion to practise peaceful, inclusive and responsible civic participation.

Step 4: Learners record key conclusions and explain how the principles apply in school, family or community life.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: Why is the Constitution important in governing Kenya? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 101

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 4	WEEK: 6	LESSON: 1	TIME: 40 minutes | ROLL: _____

Strand: 5.0 Political Developments and Governance

Sub-strand: 5.2 Civic Engagement in Governance

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify ways through which citizens participate in governance. Skills: Demonstrate appropriate ways of engaging in civic processes at school or community level. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How can citizens participate in governance?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “5.2 Civic Engagement in Governance”. They share prior knowledge and consider: How can citizens participate in governance?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to observe maps, pictures, artefacts or examples; identify key features; discuss prior knowledge in pairs; and record findings. The learner is guided to identify age-appropriate civic participation channels; discuss public participation, representation and accountability; simulate a community forum; prepare respectful suggestions on a school or community issue.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How can citizens participate in governance? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to observe maps, pictures, artefacts or examples; identify key features; discuss prior knowledge in pairs; and record findings. The learner is guided to read selected simplified provisions of the Bill of Rights; match rights to everyday examples; discuss responsibilities and respect for others; analyse case studies; design a rights-awareness poster.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How does the Bill of Rights protect people in Kenya? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

_____

_____

GRADE 9 SOCIAL STUDIES – LESSON PLAN 112

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 4	WEEK: 8	LESSON: 4	TIME: 40 minutes | ROLL: _____

Strand: 5.0 Political Developments and Governance

Sub-strand: 5.3 Kenya's Bill of Rights

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Analyse fictional situations involving the protection or limitation of rights. Skills: Analyse fictional situations involving the protection or limitation of rights. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How does the Bill of Rights protect people in Kenya?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “5.3 Kenya's Bill of Rights”. They share prior knowledge and consider: How does the Bill of Rights protect people in Kenya?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to read relevant print or digital sources; compare information in groups; interpret evidence; and present conclusions. The learner is guided to read selected simplified provisions of the Bill of Rights; match rights to everyday examples; discuss responsibilities and respect for others; analyse case studies; design a rights-awareness poster.

Step 1: Learners read short, age-appropriate source extracts or scenarios and identify the rights, responsibilities, institutions or issues involved.

Step 2: In groups, learners discuss different perspectives and distinguish facts, opinions and respectful ways of responding.

Step 3: Learners use a case study, role-play or structured discussion to practise peaceful, inclusive and responsible civic participation.

Step 4: Learners record key conclusions and explain how the principles apply in school, family or community life.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How does the Bill of Rights protect people in Kenya? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

GRADE 9 SOCIAL STUDIES – LESSON PLAN 113

SCHOOL: _____	GRADE: 9	LEARNING AREA: Social Studies	DATE: _____
TERM: 4	WEEK: 9	LESSON: 1	TIME: 40 minutes | ROLL: _____

Strand: 5.0 Political Developments and Governance

Sub-strand: 5.3 Kenya's Bill of Rights

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Identify selected rights and fundamental freedoms in the Constitution of Kenya. Skills: Analyse fictional situations involving the protection or limitation of rights. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How does the Bill of Rights protect people in Kenya?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to “5.3 Kenya's Bill of Rights”. They share prior knowledge and consider: How does the Bill of Rights protect people in Kenya?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to investigate a case study or local example; organise evidence in a chart, map or timeline; and discuss its significance. The learner is guided to read selected simplified provisions of the Bill of Rights; match rights to everyday examples; discuss responsibilities and respect for others; analyse case studies; design a rights-awareness poster.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

5 minutes – Conclusion

Learners summarise the key evidence and answer the inquiry question: How does the Bill of Rights protect people in Kenya? They complete an exit ticket stating one fact learned, one skill used and one responsible action or attitude demonstrated.

Assessment

Suggested assessment evidence: Oral questioning, map/source interpretation, written tasks, observation checklist, project portfolio, presentation and peer/self-assessment.

Reflection in the lesson / self-remarks

After teaching, record evidence of learners' understanding, map/source interpretation, collaboration, respect for diverse views, participation and progress towards the outcomes. Note learners needing support and the next instructional step.

TERM: 4	WEEK: 9	LESSON: 3	TIME: 40 minutes | ROLL: _____

Strand: 5.0 Political Developments and Governance

Sub-strand: 5.4 Cultural Globalisation

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

- **Knowledge:** Explain the meaning of cultural globalisation. Skills: Demonstrate respect for cultural diversity while making informed choices about cultural influences. Attitude: demonstrate respect, integrity, cooperation and responsibility when engaging with people, society and the environment.

Key Inquiry Question: How does cultural globalisation influence our way of life?

Learning Resources: KICD curriculum design; Social Studies learner's book; maps/atlases; charts; Constitution extracts; print/digital sources; locally available resource persons as appropriate.

Organization of Learning Learners work individually, in pairs and in groups. They use maps, source materials, charts and community information respectfully; share roles fairly; consider diverse perspectives; and follow safeguarding guidance during community-based activities.

Lesson Development

5 minutes – Introduction

Learners observe a map, photograph, short source extract, chart or familiar community example connected to "5.4 Cultural Globalisation". They share prior knowledge and consider: How does cultural globalisation influence our way of life?

30 minutes – Lesson Development

Learning experiences from the annual scheme: The learner is guided to observe maps, pictures, artefacts or examples; identify key features; discuss prior knowledge in pairs; and record findings. The learner is guided to identify examples from food, music, language, fashion, media and technology; compare cultural influences; discuss opportunities and challenges; present ways of preserving and sharing positive cultural heritage.

Step 1: Learners locate and identify relevant features on maps, photographs, diagrams or approved local sources, using titles, keys, symbols and direction where applicable.

Step 2: In pairs, learners compare evidence and describe patterns, processes or relationships between people and the physical environment.

Step 3: Groups annotate a map, prepare a labelled diagram or organise findings in a table, citing the sources used.

Step 4: Learners present evidence-based explanations and suggest responsible actions for conserving the environment or heritage.

Extended Activities

Learners who complete the task extend learning through a short local case study, annotated map, interview questions, comparison chart or additional source analysis. Learners needing support use guided questions, vocabulary lists, simplified maps and peer support. For Community Service-Learning, activities must be age-appropriate, supervised, inclusive and undertaken only with school/community guidance, safeguarding and required permissions.

Implementation Notes

This collection contains 120 Grade 9 Social Studies lesson plans across three terms and 18 sub-strands, based on the teacher-prepared full-year scheme.

The annual KICD summary suggests 120 lessons. The scheme schedules 40 lessons per term (4 lessons per week over 10 teaching weeks); this is a school-planning proposal, not a term allocation prescribed by KICD. Adjust to the approved school calendar.

Community Service-Learning activities require appropriate school and community guidance, safeguarding and permissions. This is an original teacher-prepared resource aligned to the KICD Grade 9 Social Studies curriculum design, not an official KICD publication.

Curriculum reference: KICD Grade 9 Social Studies Curriculum Design (April 2024): https://kicd.ac.ke/wp-content/uploads/2024/06/Social-Studies-Grade-9-Design-Formatted-April-2024.pdf
