GRADE 8 INTEGRATED SCIENCE — TERM 1

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 1

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 1	Lesson: 1
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.1 Elements and Compounds

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Distinguish elements, compounds and mixtures using particle models and familiar examples. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How can we tell what a substance is made of?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 1

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 2

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 1	Lesson: 2
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.1 Elements and Compounds

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Classify common substances and explain the basis for classification. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How can we tell what a substance is made of?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 1

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 14

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 3	Lesson: 4
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.1 Elements and Compounds

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Classify common substances and explain the basis for classification. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How can we tell what a substance is made of?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 1

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 27

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 6	Lesson: 2
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.2 Physical and chemical changes

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Differentiate physical and chemical changes using observable evidence. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

What evidence shows that a new substance may have formed?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.2 Physical and chemical changes

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Investigate changes involving heating, cooling, mixing and reaction. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

What evidence shows that a new substance may have formed?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 1

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 40

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 8	Lesson: 5
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.2 Physical and chemical changes

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Investigate changes involving heating, cooling, mixing and reaction. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

What evidence shows that a new substance may have formed?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 41

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 9	Lesson: 1
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.3 Classes of fire

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Identify common classes of fire and the materials involved. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How can we prevent fires and respond safely?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 1

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 53

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 11	Lesson: 3
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.3 Classes of fire

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Identify common classes of fire and the materials involved. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How can we prevent fires and respond safely?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 54

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 11	Lesson: 4
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.3 Classes of fire

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Select appropriate safe responses and explain why water is unsuitable for some fires. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How can we prevent fires and respond safely?
