GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 1

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 1	Lesson: 1
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.3 Classes of fire

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Demonstrate fire-prevention practices and emergency response procedures. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How can we prevent fires and respond safely?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 2

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 1	Lesson: 2
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 1.0 Mixtures, Elements and Compounds
Sub-strand: 1.3 Classes of fire

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Interpret fire-safety symbols and evaluate risks in familiar settings. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How can we prevent fires and respond safely?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 3

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 1	Lesson: 3
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.1 The Cell

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Describe the cell as the basic structural and functional unit of living things. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How does cell structure support life?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 4

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 1	Lesson: 4
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.1 The Cell

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Identify and describe functions of major cell structures. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How does cell structure support life?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 14

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 3	Lesson: 4
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.1 The Cell

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Use a microscope or prepared images safely to observe cells. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How does cell structure support life?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 15

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 3	Lesson: 5
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.1 The Cell

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Describe the cell as the basic structural and functional unit of living things. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How does cell structure support life?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 27

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 6	Lesson: 2
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.2 Movement of materials in and out of the cell

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Explain diffusion and osmosis using particle movement models. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How do substances move into and out of cells?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 28

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 6	Lesson: 3
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.2 Movement of materials in and out of the cell

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Investigate movement of materials across selectively permeable membranes. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How do substances move into and out of cells?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 40

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 8	Lesson: 5
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.3 Reproduction in human beings

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Explain puberty and the physical, emotional and social changes associated with it. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How do human reproductive systems support growth and continuity of life?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 9	Lesson: 1
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.3 Reproduction in human beings

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Describe fertilisation, pregnancy and responsible health practices using age-appropriate language. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How do human reproductive systems support growth and continuity of life?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

ORGANISATION OF LEARNING

Learners work individually, in pairs and in small groups. The teacher facilitates inclusive participation, observes learner progress and provides differentiated support and extension.

INTRODUCTION

The teacher uses a relevant question, picture, specimen, model, demonstration or familiar real-life situation to elicit prior knowledge. Learners share observations and relate them to the key inquiry question.

LESSON DEVELOPMENT

Activity 1 — Engage with the concept: The learner is guided to observe a stimulus; discuss prior ideas; work individually or collaboratively; investigate, model, classify, draw or solve a task; record findings; and present a conclusion.

Activity 2 — Investigate and make meaning: Learners examine the relevant models, charts, specimens, safe apparatus or digital media. In groups, they observe carefully, discuss evidence, record findings and relate their observations to the knowledge outcome.

Activity 3 — Practise and apply: Learners complete a task, investigation, classification, labelled representation, explanation or problem-solving activity appropriate to the stated sub-strand. They support conclusions with evidence and use correct scientific vocabulary.

Activity 4 — Share and give feedback: Groups present findings. Peers ask questions and compare explanations. The teacher clarifies misconceptions and reinforces safe, responsible scientific practice.

ASSESSMENT

Oral questions; observation checklist; learner's work; practical/investigation record; written exercise; peer/self-assessment.

CONCLUSION

Learners summarise the main scientific idea, respond to the key inquiry question and state one application or safety consideration. The teacher gives a short follow-up task aligned to the lesson outcomes.

REFLECTION / SELF-REMARKS

Achievement: _____
Challenges observed: _____
Remedial / enrichment action: _____

Curriculum basis: Grade 8 Integrated Science scheme of work (KICD Curriculum Design, revised 2024). Lesson outcomes, inquiry question, resources and assessment are reproduced from the corresponding scheme entry.

GRADE 8 INTEGRATED SCIENCE — TERM 2

DETAILED CBC LESSON PLAN | 2027 | CURRICULUM LESSON 53

School: _____	Teacher: _____	TSC No.: _____
Grade: 8	Week: 11	Lesson: 3
Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.3 Reproduction in human beings

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Describe fertilisation, pregnancy and responsible health practices using age-appropriate language. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.

KEY INQUIRY QUESTION

How do human reproductive systems support growth and continuity of life?

LEARNING RESOURCES

KICD-approved learner's book; charts; models; locally available materials; worksheets; safe apparatus; digital media where available.

Date: _____	Time: _____	Roll: _____

STRAND AND SUB-STRAND

Strand: 2.0 Living Things and the Environment
Sub-strand: 2.3 Reproduction in human beings

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to: 1. Knowledge: Demonstrate respect, personal responsibility and help-seeking for health concerns. 2. Skills: observe, investigate, represent or explain the concept using suitable evidence. 3. Attitude: demonstrate curiosity, safety, cooperation and responsibility.
