JUNIOR SCHOOL LEARNING HUB

GRADE 8 INTEGRATED SCIENCE — RECORDS OF WORK — TERM 1 — 2027

School: _____ **Teacher:** _____ **TSC No.:** _____

Grade 8 | Learning Area: Integrated Science | Year: 2027 | Curriculum basis: KICD Grade 8 Integrated Science Curriculum Design (revised 2024).

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
1	1	Mixtures, Elements and Compounds	Elements and Compounds	Covered distinguish elements, compounds and mixtures prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga using particle models and familiar examples. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
1	2	Mixtures, Elements and Compounds	Elements and Compounds	Covered classify common substances and explain the prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga basis for classification. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
1	3	Mixtures, Elements and Compounds	Elements and Compounds	Covered interpret chemical symbols and simple formulae. prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga		
1	4	Mixtures, Elements and Compounds	Elements and Compounds	Covered construct and explain simple particle prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga representations of elements and compounds. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
1	5	Mixtures, Elements and Compounds	Elements and Compounds	Covered distinguish elements, compounds and mixtures prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga using particle models and familiar examples. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	1	Mixtures, Elements and Compounds	Elements and Compounds	Covered classify common substances and explain the prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga basis for classification. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	2	Mixtures, Elements and Compounds	Elements and Compounds	Covered interpret chemical symbols and simple formulae. prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga		
2	3	Mixtures, Elements and Compounds	Elements and Compounds	Covered construct and explain simple particle prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga representations of elements and compounds. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	4	Mixtures, Elements and Compounds	Elements and Compounds	Covered distinguish elements, compounds and mixtures prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga using particle models and familiar examples. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
2	5	Mixtures, Elements and Compounds	Elements and Compounds	Covered classify common substances and explain the prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga basis for classification. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	1	Mixtures, Elements and Compounds	Elements and Compounds	Covered interpret chemical symbols and simple formulae. prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga		
3	2	Mixtures, Elements and Compounds	Elements and Compounds	Covered construct and explain simple particle prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga representations of elements and compounds. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	3	Mixtures, Elements and Compounds	Elements and Compounds	Covered distinguish elements, compounds and mixtures prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga using particle models and familiar examples. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	4	Mixtures, Elements and Compounds	Elements and Compounds	Covered classify common substances and explain the prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga basis for classification. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	5	Mixtures, Elements and Compounds	Elements and Compounds	Covered interpret chemical symbols and simple formulae. prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga		
4	1	Mixtures, Elements and Compounds	Elements and Compounds	Covered construct and explain simple particle prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga representations of elements and compounds. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	2	Mixtures, Elements and Compounds	Elements and Compounds	Covered distinguish elements, compounds and mixtures prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga using particle models and familiar examples. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	3	Mixtures, Elements and Compounds	Elements and Compounds	Covered classify common substances and explain the prior ideas; work individually or collaboratively; is made of? models; locally available materials; learner's work; practical/investiga basis for classification. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	4	Mixtures, Elements and Compounds	Physical and chemical changes	Covered differentiate physical and chemical changes prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga using observable evidence. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	5	Mixtures, Elements and Compounds	Physical and chemical changes	Covered investigate changes involving heating, cooling, prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga mixing and reaction. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	1	Mixtures, Elements and Compounds	Physical and chemical changes	Covered identify indicators of chemical change and relate prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga them to everyday contexts. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
5	2	Mixtures, Elements and Compounds	Physical and chemical changes	Covered explain conservation of matter qualitatively prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga during changes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	3	Mixtures, Elements and Compounds	Physical and chemical changes	Covered differentiate physical and chemical changes prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga using observable evidence. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	4	Mixtures, Elements and Compounds	Physical and chemical changes	Covered investigate changes involving heating, cooling, prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga mixing and reaction. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	5	Mixtures, Elements and Compounds	Physical and chemical changes	Covered identify indicators of chemical change and relate prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga them to everyday contexts. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	1	Mixtures, Elements and Compounds	Physical and chemical changes	Covered explain conservation of matter qualitatively prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga during changes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	2	Mixtures, Elements and Compounds	Physical and chemical changes	Covered differentiate physical and chemical changes prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga using observable evidence. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	3	Mixtures, Elements and Compounds	Physical and chemical changes	Covered investigate changes involving heating, cooling, prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga mixing and reaction. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	4	Mixtures, Elements and Compounds	Physical and chemical changes	Covered identify indicators of chemical change and relate prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga them to everyday contexts. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	5	Mixtures, Elements and Compounds	Physical and chemical changes	Covered explain conservation of matter qualitatively prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga during changes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	1	Mixtures, Elements and Compounds	Physical and chemical changes	Covered differentiate physical and chemical changes prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga using observable evidence. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	2	Mixtures, Elements and Compounds	Physical and chemical changes	Covered investigate changes involving heating, cooling, prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga mixing and reaction. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
7	3	Mixtures, Elements and Compounds	Physical and chemical changes	Covered identify indicators of chemical change and relate prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga them to everyday contexts. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	4	Mixtures, Elements and Compounds	Physical and chemical changes	Covered explain conservation of matter qualitatively prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga during changes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	5	Mixtures, Elements and Compounds	Physical and chemical changes	Covered differentiate physical and chemical changes prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga using observable evidence. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	1	Mixtures, Elements and Compounds	Physical and chemical changes	Covered investigate changes involving heating, cooling, prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga mixing and reaction. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	2	Mixtures, Elements and Compounds	Physical and chemical changes	Covered identify indicators of chemical change and relate prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga them to everyday contexts. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	3	Mixtures, Elements and Compounds	Physical and chemical changes	Covered explain conservation of matter qualitatively prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga during changes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	4	Mixtures, Elements and Compounds	Physical and chemical changes	Covered differentiate physical and chemical changes prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga using observable evidence. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	5	Mixtures, Elements and Compounds	Physical and chemical changes	Covered investigate changes involving heating, cooling, prior ideas; work individually or collaboratively; substance may have formed? models; locally available materials; learner's work; practical/investiga mixing and reaction. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
9	1	Mixtures, Elements and Compounds	Classes of fire	Covered identify common classes of fire and the materials prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga involved. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
9	2	Mixtures, Elements and Compounds	Classes of fire	Covered select appropriate safe responses and explain prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga why water is unsuitable for some fires. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
9	3	Mixtures, Elements and Compounds	Classes of fire	Covered demonstrate fire-prevention practices and prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga emergency response procedures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
9	4	Mixtures, Elements and Compounds	Classes of fire	Covered interpret fire-safety symbols and evaluate risks prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga in familiar settings. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
9	5	Mixtures, Elements and Compounds	Classes of fire	Covered identify common classes of fire and the materials prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga involved. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
10	1	Mixtures, Elements and Compounds	Classes of fire	Covered select appropriate safe responses and explain prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga why water is unsuitable for some fires. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
10	2	Mixtures, Elements and Compounds	Classes of fire	Covered demonstrate fire-prevention practices and prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga emergency response procedures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
10	3	Mixtures, Elements and Compounds	Classes of fire	Covered interpret fire-safety symbols and evaluate risks prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga in familiar settings. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
10	4	Mixtures, Elements and Compounds	Classes of fire	Covered identify common classes of fire and the materials prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga involved. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
10	5	Mixtures, Elements and Compounds	Classes of fire	Covered select appropriate safe responses and explain prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga why water is unsuitable for some fires. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
11	1	Mixtures, Elements and Compounds	Classes of fire	Covered demonstrate fire-prevention practices and prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga emergency response procedures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
11	2	Mixtures, Elements and Compounds	Classes of fire	Covered interpret fire-safety symbols and evaluate risks prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga in familiar settings. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
11	3	Mixtures, Elements and Compounds	Classes of fire	Covered identify common classes of fire and the materials prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga involved. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
11	4	Mixtures, Elements and Compounds	Classes of fire	Covered select appropriate safe responses and explain prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga why water is unsuitable for some fires. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
11	5	Mixtures, Elements and Compounds	Classes of fire	Covered demonstrate fire-prevention practices and prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga emergency response procedures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
12	1	Mixtures, Elements and Compounds	Classes of fire	Covered interpret fire-safety symbols and evaluate risks prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga in familiar settings. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
12	2	Mixtures, Elements and Compounds	Classes of fire	Covered identify common classes of fire and the materials prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga involved. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
12	3	Mixtures, Elements and Compounds	Classes of fire	Covered select appropriate safe responses and explain prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga why water is unsuitable for some fires. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;
