JUNIOR SCHOOL LEARNING HUB

GRADE 8 INTEGRATED SCIENCE — RECORDS OF WORK — TERM 2 — 2027

School: _____ Teacher: _____ TSC No.: _____

Grade 8 | Learning Area: Integrated Science | Year: 2027 | Curriculum basis: KICD Grade 8 Integrated Science Curriculum Design (revised 2024).

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
1	1	Mixtures, Elements and Compounds	Classes of fire	Covered demonstrate fire-prevention practices and prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga emergency response procedures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
1	2	Mixtures, Elements and Compounds	Classes of fire	Covered interpret fire-safety symbols and evaluate risks prior ideas; work individually or collaboratively; respond safely? models; locally available materials; learner's work; practical/investiga in familiar settings. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
1	3	Living Things and the Environment	The Cell	Covered describe the cell as the basic structural and prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga functional unit of living things. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
1	4	Living Things and the Environment	The Cell	Covered identify and describe functions of major cell prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga structures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
1	5	Living Things and the Environment	The Cell	Covered compare plant and animal cells using labelled prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga diagrams and models. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	1	Living Things and the Environment	The Cell	Covered use a microscope or prepared images safely to prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga observe cells. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	2	Living Things and the Environment	The Cell	Covered describe the cell as the basic structural and prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga functional unit of living things. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	3	Living Things and the Environment	The Cell	Covered identify and describe functions of major cell prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga structures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
2	4	Living Things and the Environment	The Cell	Covered compare plant and animal cells using labelled prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga diagrams and models. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	5	Living Things and the Environment	The Cell	Covered use a microscope or prepared images safely to prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga observe cells. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	1	Living Things and the Environment	The Cell	Covered describe the cell as the basic structural and prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga functional unit of living things. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	2	Living Things and the Environment	The Cell	Covered identify and describe functions of major cell prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga structures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	3	Living Things and the Environment	The Cell	Covered compare plant and animal cells using labelled prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga diagrams and models. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	4	Living Things and the Environment	The Cell	Covered use a microscope or prepared images safely to prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga observe cells. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	5	Living Things and the Environment	The Cell	Covered describe the cell as the basic structural and prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga functional unit of living things. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	1	Living Things and the Environment	The Cell	Covered identify and describe functions of major cell prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga structures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	2	Living Things and the Environment	The Cell	Covered compare plant and animal cells using labelled prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga diagrams and models. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	3	Living Things and the Environment	The Cell	Covered use a microscope or prepared images safely to prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga observe cells. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	4	Living Things and the Environment	The Cell	Covered describe the cell as the basic structural and prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga functional unit of living things. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
4	5	Living Things and the Environment	The Cell	Covered identify and describe functions of major cell prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga structures. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	1	Living Things and the Environment	The Cell	Covered compare plant and animal cells using labelled prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga diagrams and models. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	2	Living Things and the Environment	The Cell	Covered use a microscope or prepared images safely to prior ideas; work individually or collaboratively; life? models; locally available materials; learner's work; practical/investiga observe cells. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	3	Living Things and the Environment	Movement of materials in and out of	Covered explain diffusion and osmosis using particle prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga movement models. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	4	Living Things and the Environment	Movement of materials in and out of	Covered investigate movement of materials across prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga selectively permeable membranes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	5	Living Things and the Environment	Movement of materials in and out of	Covered relate movement of materials to cell survival prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga and everyday examples. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	1	Living Things and the Environment	Movement of materials in and out of	Covered record observations and draw evidence-based prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga conclusions. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	2	Living Things and the Environment	Movement of materials in and out of	Covered explain diffusion and osmosis using particle prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga movement models. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	3	Living Things and the Environment	Movement of materials in and out of	Covered investigate movement of materials across prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga selectively permeable membranes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	4	Living Things and the Environment	Movement of materials in and out of	Covered relate movement of materials to cell survival prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga and everyday examples. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	5	Living Things and the Environment	Movement of materials in and out of	Covered record observations and draw evidence-based prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga conclusions. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
7	1	Living Things and the Environment	Movement of materials in and out of	Covered explain diffusion and osmosis using particle prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga movement models. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	2	Living Things and the Environment	Movement of materials in and out of	Covered investigate movement of materials across prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga selectively permeable membranes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	3	Living Things and the Environment	Movement of materials in and out of	Covered relate movement of materials to cell survival prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga and everyday examples. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	4	Living Things and the Environment	Movement of materials in and out of	Covered record observations and draw evidence-based prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga conclusions. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	5	Living Things and the Environment	Movement of materials in and out of	Covered explain diffusion and osmosis using particle prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga movement models. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	1	Living Things and the Environment	Movement of materials in and out of	Covered investigate movement of materials across prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga selectively permeable membranes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	2	Living Things and the Environment	Movement of materials in and out of	Covered relate movement of materials to cell survival prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga and everyday examples. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	3	Living Things and the Environment	Movement of materials in and out of	Covered record observations and draw evidence-based prior ideas; work individually or collaboratively; out of cells? models; locally available materials; learner's work; practical/investiga conclusions. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	4	Living Things and the Environment	Reproduction in human beings	Covered describe the major structures and functions of prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga the human reproductive systems. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
8	5	Living Things and the Environment	Reproduction in human beings	Covered explain puberty and the physical, emotional and prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga social changes associated with it. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
9	1	Living Things and the Environment	Reproduction in human beings	Covered describe fertilisation, pregnancy and responsible prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga health practices using age-appropriate language. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
9	2	Living Things and the Environment	Reproduction in human beings	Covered demonstrate respect, personal responsibility prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga and help-seeking for health concerns. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
9	3	Living Things and the Environment	Reproduction in human beings	Covered describe the major structures and functions of prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga the human reproductive systems. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
9	4	Living Things and the Environment	Reproduction in human beings	Covered explain puberty and the physical, emotional and prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga social changes associated with it. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
9	5	Living Things and the Environment	Reproduction in human beings	Covered describe fertilisation, pregnancy and responsible prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga health practices using age-appropriate language. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
10	1	Living Things and the Environment	Reproduction in human beings	Covered demonstrate respect, personal responsibility prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga and help-seeking for health concerns. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
10	2	Living Things and the Environment	Reproduction in human beings	Covered describe the major structures and functions of prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga the human reproductive systems. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
10	3	Living Things and the Environment	Reproduction in human beings	Covered explain puberty and the physical, emotional and prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga social changes associated with it. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
10	4	Living Things and the Environment	Reproduction in human beings	Covered describe fertilisation, pregnancy and responsible prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga health practices using age-appropriate language. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
10	5	Living Things and the Environment	Reproduction in human beings	Covered demonstrate respect, personal responsibility prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga and help-seeking for health concerns. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
11	1	Living Things and the Environment	Reproduction in human beings	Covered describe the major structures and functions of prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga the human reproductive systems. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
11	2	Living Things and the Environment	Reproduction in human beings	Covered explain puberty and the physical, emotional and prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga social changes associated with it. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
11	3	Living Things and the Environment	Reproduction in human beings	Covered describe fertilisation, pregnancy and responsible prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga health practices using age-appropriate language. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
11	4	Living Things and the Environment	Reproduction in human beings	Covered demonstrate respect, personal responsibility prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga and help-seeking for health concerns. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;
