JUNIOR SCHOOL LEARNING HUB

GRADE 8 INTEGRATED SCIENCE — RECORDS OF WORK — TERM 3 — 2027

School: _____ Teacher: _____ TSC No.: _____

Grade 8 | Learning Area: Integrated Science | Year: 2027 | Curriculum basis: KICD Grade 8 Integrated Science Curriculum Design (revised 2024).

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
1	1	Living Things and the Environment	Reproduction in human beings	Covered describe the major structures and functions of prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga the human reproductive systems. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
1	2	Living Things and the Environment	Reproduction in human beings	Covered explain puberty and the physical, emotional and prior ideas; work individually or collaboratively; systems support growth and models; locally available materials; learner's work; practical/investiga social changes associated with it. investigate, model, classify, draw or solve a task; record continuity of life? worksheets; safe apparatus; digital record; written exercise;		
1	3	Force and Energy	Transformation of Energy	Covered identify common forms of energy and describe prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga transformations between them. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
1	4	Force and Energy	Transformation of Energy	Covered trace energy changes in familiar devices and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga natural processes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
1	5	Force and Energy	Transformation of Energy	Covered investigate energy transformations and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga represent them using flow diagrams. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	1	Force and Energy	Transformation of Energy	Covered explain energy efficiency and responsible prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga energy use. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	2	Force and Energy	Transformation of Energy	Covered identify common forms of energy and describe prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga transformations between them. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	3	Force and Energy	Transformation of Energy	Covered trace energy changes in familiar devices and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga natural processes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
2	4	Force and Energy	Transformation of Energy	Covered investigate energy transformations and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga represent them using flow diagrams. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
2	5	Force and Energy	Transformation of Energy	Covered explain energy efficiency and responsible prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga energy use. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	1	Force and Energy	Transformation of Energy	Covered identify common forms of energy and describe prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga transformations between them. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	2	Force and Energy	Transformation of Energy	Covered trace energy changes in familiar devices and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga natural processes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	3	Force and Energy	Transformation of Energy	Covered investigate energy transformations and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga represent them using flow diagrams. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	4	Force and Energy	Transformation of Energy	Covered explain energy efficiency and responsible prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga energy use. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
3	5	Force and Energy	Transformation of Energy	Covered identify common forms of energy and describe prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga transformations between them. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	1	Force and Energy	Transformation of Energy	Covered trace energy changes in familiar devices and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga natural processes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	2	Force and Energy	Transformation of Energy	Covered investigate energy transformations and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga represent them using flow diagrams. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	3	Force and Energy	Transformation of Energy	Covered explain energy efficiency and responsible prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga energy use. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
4	4	Force and Energy	Transformation of Energy	Covered identify common forms of energy and describe prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga transformations between them. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
4	5	Force and Energy	Transformation of Energy	Covered trace energy changes in familiar devices and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga natural processes. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	1	Force and Energy	Transformation of Energy	Covered investigate energy transformations and prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga represent them using flow diagrams. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	2	Force and Energy	Transformation of Energy	Covered explain energy efficiency and responsible prior ideas; work individually or collaboratively; everyday systems? models; locally available materials; learner's work; practical/investiga energy use. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	3	Force and Energy	Pressure	Covered define pressure and relate it to force and area prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga qualitatively and quantitatively. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	4	Force and Energy	Pressure	Covered investigate how contact area affects pressure in prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga everyday situations. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
5	5	Force and Energy	Pressure	Covered explain pressure in liquids and gases through prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga simple models and demonstrations. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	1	Force and Energy	Pressure	Covered apply pressure concepts to solve familiar prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga problems and explain practical applications. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	2	Force and Energy	Pressure	Covered define pressure and relate it to force and area prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga qualitatively and quantitatively. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	3	Force and Energy	Pressure	Covered investigate how contact area affects pressure in prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga everyday situations. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	4	Force and Energy	Pressure	Covered explain pressure in liquids and gases through prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga simple models and demonstrations. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
6	5	Force and Energy	Pressure	Covered apply pressure concepts to solve familiar prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga problems and explain practical applications. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		

Week	Lesson	Strand	Sub-strand	Work Covered	Date	Sign
7	1	Force and Energy	Pressure	Covered define pressure and relate it to force and area prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga qualitatively and quantitatively. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	2	Force and Energy	Pressure	Covered investigate how contact area affects pressure in prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga everyday situations. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	3	Force and Energy	Pressure	Covered explain pressure in liquids and gases through prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga simple models and demonstrations. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	4	Force and Energy	Pressure	Covered apply pressure concepts to solve familiar prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga problems and explain practical applications. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
7	5	Force and Energy	Pressure	Covered define pressure and relate it to force and area prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga qualitatively and quantitatively. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	1	Force and Energy	Pressure	Covered investigate how contact area affects pressure in prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga everyday situations. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	2	Force and Energy	Pressure	Covered explain pressure in liquids and gases through prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga simple models and demonstrations. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;		
8	3	Force and Energy	Pressure	Covered apply pressure concepts to solve familiar prior ideas; work individually or collaboratively; area affect pressure? models; locally available materials; learner's work; practical/investiga problems and explain practical applications. investigate, model, classify, draw or solve a task; record worksheets; safe apparatus; digital record; written exercise;
