GRADE 8 AGRICULTURE

DETAILED TEACHING NOTES – FULL YEAR 2027

School: _____ **Teacher:** _____ **TSC No.:** _____

Grade: 8 | **Learning Area:** Agriculture | **Suggested lessons:** 120

Curriculum note: These teacher-prepared notes are organised around the Grade 8 Agriculture strand and sub-strand sequence used in the accompanying scheme. They expand the scheme lesson focuses into explanations and practical teaching guidance; they are not a verbatim reproduction of the full KICD curriculum design. Consult the official KICD design for exact wording of all specific learning outcomes, assessment rubrics, core competencies, values, PCIs and links to other learning areas.

Teaching approach: Use learner-centred observation, discussion, research, demonstration and supervised practical work. Connect learning to the local agricultural environment. Emphasise resource conservation, hygiene, safe tool use, animal welfare, environmental care and responsible use of digital resources.

YEAR OVERVIEW

Strand	Sub-strand	Suggested lessons
1.0 Conservation of Resources	1.1 Soil Conservation Measures	10
1.0 Conservation of Resources	1.2 Water Harvesting and Storage	9
2.0 Food Production Processes	2.1 Kitchen and Backyard Gardening	9
2.0 Food Production Processes	2.2 Poultry Rearing in a Fold	11
2.0 Food Production Processes	2.3 Crop Pest and Disease Control	10
2.0 Food Production Processes	2.4 Preparation of Animal Products	9
2.0 Food Production Processes	2.5 Preserving Animal Products	9
2.0 Food Production Processes	2.6 Cooking: Preparing a Balanced Meal	11
3.0 Hygiene Practices	3.1 Cleaning the Kitchen	9
4.0 Production Techniques	4.1 Sewing Skills: Constructing Household Items	14
4.0 Production Techniques	4.2 Constructing Innovative Animal Waterer	10
4.0 Production Techniques	4.3 ICT Support Services	9
TOTAL	12 sub-strands	120

1.1 Soil Conservation Measures

Strand: 1.0 Conservation of Resources   **Suggested lessons:** 10

Key inquiry question

How can we conserve soil in the agricultural environment?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Describe methods of soil conservation in an agricultural environment

• Carry out soil conservation activities in the environment

• Demonstrate a caring attitude towards soil in the environment

Teaching content and lesson sequence

Lesson focus 1: Meaning and importance of soil conservation

The lesson introduces and develops meaning and importance of soil conservation. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Causes of soil erosion

The lesson introduces and develops causes of soil erosion. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Effects of soil erosion on agricultural land

The lesson introduces and develops effects of soil erosion on agricultural land. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Physical soil conservation measures

The lesson introduces and develops physical soil conservation measures. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Biological soil conservation measures

The lesson introduces and develops biological soil conservation measures. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Contour farming and terracing

The lesson introduces and develops contour farming and terracing. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Mulching and cover crops

The lesson introduces and develops mulching and cover crops. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Grass strips and windbreaks

The lesson introduces and develops grass strips and windbreaks. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Selecting suitable measures for local conditions

The lesson introduces and develops selecting suitable measures for local conditions. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 10: Carrying out a soil conservation activity

The lesson introduces and develops carrying out a soil conservation activity. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the

concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Search for information on soil conservation methods using print and digital resources

• Observe the school or local environment to identify signs and causes of soil erosion

• Discuss and compare physical and biological soil conservation measures

• Demonstrate selected soil conservation practices in a safe school plot

• Present findings on the suitability of different methods in the local environment

Key vocabulary and concepts

meaning and importance of soil conservation, causes of soil erosion, effects of soil erosion on agricultural land, physical soil conservation measures, biological soil conservation measures.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Use appropriate protective clothing and safe procedures. Avoid unknown chemicals or contaminated materials, wash hands after practical work and minimise damage to the environment.

Teacher reflection: _____

1.2 Water Harvesting and Storage

Strand: 1.0 Conservation of Resources   **Suggested lessons:** 9

Key inquiry question

How can we harvest and store water for domestic purposes?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Discuss ways of storing harvested water for domestic use

• Take part in harvesting and storing water in the school for domestic use

• Show responsibility in harvesting and storing water for domestic use

Teaching content and lesson sequence

Lesson focus 1: Importance of harvesting and storing water

The lesson introduces and develops importance of harvesting and storing water. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Sources of rainwater and surface run-off

The lesson introduces and develops sources of rainwater and surface run-off. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Shallow water pans

The lesson introduces and develops shallow water pans. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Water ponds

The lesson introduces and develops water ponds. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Suitable water containers

The lesson introduces and develops suitable water containers. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide

learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Selecting safe storage methods

The lesson introduces and develops selecting safe storage methods. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Initiating water harvesting in school

The lesson introduces and develops initiating water harvesting in school. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Maintaining water harvesting and storage facilities

The lesson introduces and develops maintaining water harvesting and storage facilities. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Presenting a school water harvesting initiative

The lesson introduces and develops presenting a school water harvesting initiative. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Search and share information in groups on shallow water pans, water ponds and suitable water containers

• Identify opportunities for harvesting rainwater and surface run-off in the school

• Initiate a suitable water harvesting and storage measure with guidance

• Make class presentations on initiatives and maintenance practices

Key vocabulary and concepts

importance of harvesting and storing water, sources of rainwater and surface run-off, shallow water pans, water ponds, suitable water containers.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Keep learners away from open water and unstable banks. Site visits or practical construction require permission, barriers and direct adult supervision.

Teacher reflection: _____

2.1 Kitchen and Backyard Gardening

Strand: 2.0 Food Production Processes   **Suggested lessons:** 9

Key inquiry question

How does a kitchen garden contribute to food production?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Explain the role of kitchen and backyard gardens in food production

• Establish a kitchen and backyard garden for food production

• Adopt the use of kitchen and backyard gardens for food production

Teaching content and lesson sequence

Lesson focus 1: Roles of kitchen and backyard gardens in food production

The lesson introduces and develops roles of kitchen and backyard gardens in food production. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Benefits of fresh and readily accessible foods

The lesson introduces and develops benefits of fresh and readily accessible foods. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Planning a kitchen or backyard garden

The lesson introduces and develops planning a kitchen or backyard garden. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Selecting vegetables, herbs and spices

The lesson introduces and develops selecting vegetables, herbs and spices. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Preparing a garden site

The lesson introduces and develops preparing a garden site. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Planting selected crops

The lesson introduces and develops planting selected crops. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Watering and routine crop care

The lesson introduces and develops watering and routine crop care. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Maintaining a kitchen or backyard garden

The lesson introduces and develops maintaining a kitchen or backyard garden. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Harvesting and using garden produce

The lesson introduces and develops harvesting and using garden produce. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Use digital and print resources to search for roles of kitchen and backyard gardens, including fresh healthy foods, saving money and readily accessible food

• Prepare a kitchen or backyard garden and plant vegetables, herbs and spices

• Take care of crops established in the garden and discuss their use in food production

Key vocabulary and concepts

roles of kitchen and backyard gardens in food production, benefits of fresh and readily accessible foods, planning a kitchen or backyard garden, selecting vegetables, herbs and spices, preparing a garden site.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Keep learners away from open water and unstable banks. Site visits or practical construction require permission, barriers and direct adult supervision.

Teacher reflection: _____

2.2 Poultry Rearing in a Fold

Strand: 2.0 Food Production Processes   **Suggested lessons:** 11

Key inquiry question

How can we rear poultry in a fold for food production?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Describe a fold in poultry rearing

• Construct a fold for rearing poultry

• Rear poultry in a fold

• Show responsibility in rearing poultry

Teaching content and lesson sequence

Lesson focus 1: Meaning and features of a poultry fold

The lesson introduces and develops meaning and features of a poultry fold. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Types and examples of poultry folds

The lesson introduces and develops types and examples of poultry folds. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Materials for constructing a poultry fold

The lesson introduces and develops materials for constructing a poultry fold. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Planning and sketching a poultry fold

The lesson introduces and develops planning and sketching a poultry fold. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Measuring and preparing materials

The lesson introduces and develops measuring and preparing materials. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Constructing the fold

The lesson introduces and develops constructing the fold. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Preparing the fold for poultry

The lesson introduces and develops preparing the fold for poultry. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Selecting and introducing poultry

The lesson introduces and develops selecting and introducing poultry. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Feeding and watering poultry

The lesson introduces and develops feeding and watering poultry. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 10: Moving the fold, sanitation and predator protection

The lesson introduces and develops moving the fold, sanitation and predator protection. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 11: Monitoring poultry and keeping simple records

The lesson introduces and develops monitoring poultry and keeping simple records. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Search and observe video clips or images of poultry folds and share observations

• Use locally available reused and recycled wire, plastic and wood materials to construct a fold

• Undertake a supervised project to rear selected poultry in a fold

• Practise moving the fold, feeding, watering, sanitation and protection from predators and harsh weather

Key vocabulary and concepts

meaning and features of a poultry fold, types and examples of poultry folds, materials for constructing a poultry fold, planning and sketching a poultry fold, measuring and preparing materials.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Ensure adult supervision, animal welfare, handwashing, clean equipment and safe food handling. Practical work involving live animals or raw animal products should only take place where appropriate facilities and competent supervision are available.

Teacher reflection: _____

2.3 Crop Pest and Disease Control

Strand: 2.0 Food Production Processes   **Suggested lessons:** 10

Key inquiry question

How can we identify and control pests and diseases affecting vegetable crops?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Identify vegetable crops attacked by pests and diseases

• Control pests and diseases on vegetable crops

• Acknowledge the importance of controlling pests and diseases in vegetable production

Teaching content and lesson sequence

Lesson focus 1: Common pests affecting vegetable crops

The lesson introduces and develops common pests affecting vegetable crops. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Signs of pest attack: punctured leaves, cut seedlings and curling leaves

The lesson introduces and develops signs of pest attack: punctured leaves, cut seedlings and curling leaves. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Common sites where crop pests are found

The lesson introduces and develops common sites where crop pests are found. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Common signs of crop diseases: wilting, spots and rotting

The lesson introduces and develops common signs of crop diseases: wilting, spots and rotting. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Field observation and identification of affected crops

The lesson introduces and develops field observation and identification of affected crops. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Handpicking pests

The lesson introduces and develops handpicking pests. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Removing affected crop parts

The lesson introduces and develops removing affected crop parts. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Uprooting heavily affected crops

The lesson introduces and develops uprooting heavily affected crops. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Using natural pesticides such as ash safely

The lesson introduces and develops using natural pesticides such as ash safely. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 10: Importance of controlling pests and diseases in vegetable production

The lesson introduces and develops importance of controlling pests and diseases in vegetable production. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations

• Visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting

• Control pests through handpicking, removing affected parts, uprooting heavily affected crops and applying natural pesticides such as ash under guidance

• Control diseases by removing affected parts and uprooting heavily affected crops

• Discuss and present the importance of pest and disease control

Key vocabulary and concepts

common pests affecting vegetable crops, signs of pest attack: punctured leaves, cut seedlings and curling leaves, common sites where crop pests are found, common signs of crop diseases: wilting, spots and rotting, field observation and identification of affected crops.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Use appropriate protective clothing and safe procedures. Avoid unknown chemicals or contaminated materials, wash hands after practical work and minimise damage to the environment.

Teacher reflection: _____

2.4 Preparation of Animal Products

Strand: 2.0 Food Production Processes   **Suggested lessons:** 9

Key inquiry question

Why is it important to prepare animal products hygienically and safely?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Explain the importance of processing fish and dressing poultry carcasses

• Process fresh fish for various purposes

• Dress poultry carcasses for various purposes

• Uphold ethical and safety practices in preparation of animal products

Teaching content and lesson sequence

Lesson focus 1: Importance of processing fresh fish

The lesson introduces and develops importance of processing fresh fish. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Preparation and cleaning of fresh fish

The lesson introduces and develops preparation and cleaning of fresh fish. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Processing fish for different purposes

The lesson introduces and develops processing fish for different purposes. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Food hygiene and safety when handling fish

The lesson introduces and develops food hygiene and safety when handling fish. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Importance of dressing a poultry carcass

The lesson introduces and develops importance of dressing a poultry carcass. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Safe and hygienic poultry carcass dressing

The lesson introduces and develops safe and hygienic poultry carcass dressing. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Tools and equipment used in preparation

The lesson introduces and develops tools and equipment used in preparation. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Ethical practices in preparing animal products

The lesson introduces and develops ethical practices in preparing animal products. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Presenting processed animal products for use

The lesson introduces and develops presenting processed animal products for use. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Search for information on the importance of processing fish and dressing poultry carcasses

• Observe demonstrations or approved video resources on fish processing and poultry dressing

• Identify tools, hygiene requirements and safe procedures

• Undertake practical activities only where facilities, supervision and food safety conditions permit

• Discuss ethical considerations and safe handling of animal products

Key vocabulary and concepts

importance of processing fresh fish, preparation and cleaning of fresh fish, processing fish for different purposes, food hygiene and safety when handling fish, importance of dressing a poultry carcass.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Ensure adult supervision, animal welfare, handwashing, clean equipment and safe food handling. Practical work involving live animals or raw animal products should only take place where appropriate facilities and competent supervision are available.

Teacher reflection: _____

2.5 Preserving Animal Products

Strand: 2.0 Food Production Processes   **Suggested lessons:** 9

Key inquiry question

How can we preserve milk and meat at household level?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Explain the importance of preserving milk and meat at household level

• Preserve meat to prolong shelf life at household level

• Preserve milk to prolong shelf life at household level

• Embrace the use of various methods to preserve animal products at household level

Teaching content and lesson sequence

Lesson focus 1: Importance of preserving milk and meat at household level

The lesson introduces and develops importance of preserving milk and meat at household level. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Hygienic handling of milk and meat

The lesson introduces and develops hygienic handling of milk and meat. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Boiling milk

The lesson introduces and develops boiling milk. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Fermenting milk

The lesson introduces and develops fermenting milk. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Home cooling techniques for milk

The lesson introduces and develops home cooling techniques for milk. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Salting meat

The lesson introduces and develops salting meat. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Boiling meat for preservation

The lesson introduces and develops boiling meat for preservation. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide

learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Drying and smoking meat

The lesson introduces and develops drying and smoking meat. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Presenting suitable household preservation methods

The lesson introduces and develops presenting suitable household preservation methods. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Search digital and print resources and share experiences on the importance of preserving milk and meat

• Preserve milk through boiling, fermenting and home cooling techniques

• Preserve meat through salting, boiling, drying and smoking

• Make presentations promoting applicable household methods of preserving animal products

Key vocabulary and concepts

importance of preserving milk and meat at household level, hygienic handling of milk and meat, boiling milk, fermenting milk, home cooling techniques for milk.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Ensure adult supervision, animal welfare, handwashing, clean equipment and safe food handling. Practical work involving live animals or raw animal products should only take place where appropriate facilities and competent supervision are available.

Teacher reflection: _____

2.6 Cooking: Preparing a Balanced Meal

Strand: 2.0 Food Production Processes   **Suggested lessons:** 11

Key inquiry question

How can we prepare a balanced meal for healthy living?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Explain factors to consider in preparing a balanced meal

• Prepare a balanced meal for healthy living

• Use various styles to present the meal

• Adopt the use of a balanced meal in day-to-day life

Teaching content and lesson sequence

Lesson focus 1: Meaning and components of a balanced meal

The lesson introduces and develops meaning and components of a balanced meal. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Factors considered when planning meals: age, health status, occasion and gender

The lesson introduces and develops factors considered when planning meals: age, health status, occasion and gender. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Selecting foods from food groups

The lesson introduces and develops selecting foods from food groups. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide

learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Planning a balanced meal

The lesson introduces and develops planning a balanced meal. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Preparing ingredients and observing hygiene

The lesson introduces and develops preparing ingredients and observing hygiene. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Cooking foods containing proteins

The lesson introduces and develops cooking foods containing proteins. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Cooking foods containing carbohydrates

The lesson introduces and develops cooking foods containing carbohydrates. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Including vegetables, vitamins and minerals

The lesson introduces and develops including vegetables, vitamins and minerals. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Serving styles: family and blue plate

The lesson introduces and develops serving styles: family and blue plate. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 10: Preparing menus for balanced meals

The lesson introduces and develops preparing menus for balanced meals. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 11: Presenting and evaluating a balanced meal

The lesson introduces and develops presenting and evaluating a balanced meal. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Discuss factors to consider when preparing a balanced meal, including age, health status, occasion and gender

• Plan and cook a balanced meal containing proteins, carbohydrates, vitamins and minerals

• Serve the meal using appropriate styles such as family or blue plate

• Make menus for balanced meals and present them in class

Key vocabulary and concepts

meaning and components of a balanced meal, factors considered when planning meals: age, health status, occasion and gender, selecting foods from food groups, planning a balanced meal, preparing ingredients and observing hygiene.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Use appropriate protective clothing and safe procedures. Avoid unknown chemicals or contaminated materials, wash hands after practical work and minimise damage to the environment.

Teacher reflection: _____

3.1 Cleaning the Kitchen

Strand: 3.0 Hygiene Practices   **Suggested lessons:** 9

Key inquiry question

How can daily, weekly and special cleaning enhance hygiene in the kitchen?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Explain routine cleaning practices of a kitchen

• Carry out cleaning of a kitchen to maintain hygiene

• Appreciate the importance of a clean kitchen for healthy living

Teaching content and lesson sequence

Lesson focus 1: Importance of kitchen cleanliness and hygiene

The lesson introduces and develops importance of kitchen cleanliness and hygiene. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Daily kitchen cleaning practices

The lesson introduces and develops daily kitchen cleaning practices. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Cleaning kitchen work surfaces and equipment

The lesson introduces and develops cleaning kitchen work surfaces and equipment. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Cleaning floors and storage areas

The lesson introduces and develops cleaning floors and storage areas. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Weekly kitchen cleaning practices

The lesson introduces and develops weekly kitchen cleaning practices. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Special or periodic kitchen cleaning

The lesson introduces and develops special or periodic kitchen cleaning. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Safe use and storage of cleaning materials

The lesson introduces and develops safe use and storage of cleaning materials. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Organising roles during kitchen cleaning

The lesson introduces and develops organising roles during kitchen cleaning. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Importance of a clean kitchen for healthy living

The lesson introduces and develops importance of a clean kitchen for healthy living. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Share experiences on daily, weekly and special kitchen cleaning

• Carry out daily, weekly and special cleaning practices to maintain kitchen hygiene

• Discuss and present the importance of a clean kitchen for healthy living

Key vocabulary and concepts

importance of kitchen cleanliness and hygiene, daily kitchen cleaning practices, cleaning kitchen work surfaces and equipment, cleaning floors and storage areas, weekly kitchen cleaning practices.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Use appropriate protective clothing and safe procedures. Avoid unknown chemicals or contaminated materials, wash hands after practical work and minimise damage to the environment.

Teacher reflection: _____

4.1 Sewing Skills: Constructing Household Items

Strand: 4.0 Production Techniques   **Suggested lessons:** 14

Key inquiry question

How are seams used in making household items?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Identify types of seams used in making household items

• Make samples of seams on a piece of cloth

• Construct a household item using seams

• Appreciate the use of seams in making household items

Teaching content and lesson sequence

Lesson focus 1: Meaning and purpose of seams in household items

The lesson introduces and develops meaning and purpose of seams in household items. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Types of seams used in household items

The lesson introduces and develops types of seams used in household items. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Selecting fabric and sewing materials

The lesson introduces and develops selecting fabric and sewing materials. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Measuring and marking fabric

The lesson introduces and develops measuring and marking fabric. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Preparing fabric pieces

The lesson introduces and develops preparing fabric pieces. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Making a plain seam sample

The lesson introduces and develops making a plain seam sample. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Making a suitable enclosed seam sample

The lesson introduces and develops making a suitable enclosed seam sample. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Making a suitable decorative or reinforced seam sample

The lesson introduces and develops making a suitable decorative or reinforced seam sample. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Finishing and pressing seam samples

The lesson introduces and develops finishing and pressing seam samples. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 10: Selecting a simple household item to construct

The lesson introduces and develops selecting a simple household item to construct. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 11: Planning and cutting fabric for the item

The lesson introduces and develops planning and cutting fabric for the item. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 12: Constructing the item using appropriate seams

The lesson introduces and develops constructing the item using appropriate seams. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 13: Finishing and checking the item

The lesson introduces and develops finishing and checking the item. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 14: Appreciating the use of seams in household items

The lesson introduces and develops appreciating the use of seams in household items. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Observe examples or pictures of seams used in household items

• Identify and discuss different seam types

• Make samples of seams on pieces of cloth using appropriate tools and safety practices

• Plan and construct a simple household item using suitable seams

• Display completed items and discuss quality, neatness and usefulness

Key vocabulary and concepts

meaning and purpose of seams in household items, types of seams used in household items, selecting fabric and sewing materials, measuring and marking fabric, preparing fabric pieces.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Use tools only under teacher supervision. Store sharp tools safely, use non-toxic materials and check that constructed items have no sharp edges or unstable parts.

Teacher reflection: _____

4.2 Constructing Innovative Animal Waterer

Strand: 4.0 Production Techniques   **Suggested lessons:** 10

Key inquiry question

How can we make an innovative waterer for small domestic animals?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Explain challenges with animal waterers used in the community

• Design and construct an innovative waterer for water conservation

• Appreciate the use of innovative waterers in animal rearing

Teaching content and lesson sequence

Lesson focus 1: Common animal waterers used in the community

The lesson introduces and develops common animal waterers used in the community. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Challenges associated with existing animal waterers

The lesson introduces and develops challenges associated with existing animal waterers. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Identifying a problem to solve

The lesson introduces and develops identifying a problem to solve. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Searching for innovative waterer designs

The lesson introduces and develops searching for innovative waterer designs. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Selecting locally available and reused materials

The lesson introduces and develops selecting locally available and reused materials. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Sketching and planning an innovative waterer

The lesson introduces and develops sketching and planning an innovative waterer. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Constructing the waterer for a small domestic animal

The lesson introduces and develops constructing the waterer for a small domestic animal. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Testing functionality and water conservation

The lesson introduces and develops testing functionality and water conservation. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Adjusting and improving the design

The lesson introduces and develops adjusting and improving the design. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 10: Using and evaluating the innovative waterer

The lesson introduces and develops using and evaluating the innovative waterer. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Visit animal-rearing households where appropriate and identify challenges of existing waterers

• Search digital and print media for information on innovative waterers

• Design and construct a waterer for a small domestic animal using locally available materials

• Test functionality, make adjustments and provide water to the target animal at home, school or a selected household with permission

Key vocabulary and concepts

common animal waterers used in the community, challenges associated with existing animal waterers, identifying a problem to solve, searching for innovative waterer designs, selecting locally available and reused materials.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Ensure adult supervision, animal welfare, handwashing, clean equipment and safe food handling. Practical work involving live animals or raw animal products should only take place where appropriate facilities and competent supervision are available.

Teacher reflection: _____

4.3 ICT Support Services

Strand: 4.0 Production Techniques   **Suggested lessons:** 9

Key inquiry question

How can ICT be used to access support services?

Learning outcomes for the sub-strand

At the end of the sub-strand, the learner should be able to:

• Describe support services that can be accessed through use of ICT

• Access support services using ICT

• Show responsibility in use of ICT in accessing support services

Teaching content and lesson sequence

Lesson focus 1: Meaning of ICT support services

The lesson introduces and develops meaning of ict support services. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 2: Examples of support services accessed through ICT

The lesson introduces and develops examples of support services accessed through ict. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 3: Identifying a suitable support service

The lesson introduces and develops identifying a suitable support service. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 4: Devices and connectivity needed to access services

The lesson introduces and develops devices and connectivity needed to access services. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 5: Accessing relevant support services using ICT

The lesson introduces and develops accessing relevant support services using ict. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 6: Entering and checking information safely

The lesson introduces and develops entering and checking information safely. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 7: Responsible use of personal information

The lesson introduces and develops responsible use of personal information. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 8: Digital safety, privacy and respectful communication

The lesson introduces and develops digital safety, privacy and respectful communication. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Lesson focus 9: Presenting benefits and responsible use of ICT support services

The lesson introduces and develops presenting benefits and responsible use of ict support services. Begin by eliciting learners' prior knowledge and clarifying important terms. Use the relevant objects, examples, illustrations or approved information sources to explain the concept. Guide learners to observe, compare, ask questions and record their findings.

Suggested learning experiences

• Search for information on support services that can be accessed through ICT

• Identify appropriate services and demonstrate access using available digital devices

• Discuss responsible use of ICT, privacy and safe handling of information

• Share experiences and present the benefits of ICT support services

Key vocabulary and concepts

meaning of ict support services, examples of support services accessed through ict, identifying a suitable support service, devices and connectivity needed to access services, accessing relevant support services using ict.

Assessment guidance

Use oral and written questions, observation checklists, practical demonstrations, learner records, group presentations, peer assessment and self-assessment. Assess both understanding and the ability to apply learning safely in an agricultural context.

Safety, hygiene and environmental care

Use teacher-approved digital devices and services. Protect personal information, avoid suspicious links and check the reliability of online information.

Teacher reflection: _____
