GRADE 8 AGRICULTURE – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 1

Week: 1 Lesson: 1 Date: _____ Time: _____ Roll: _____

Strand: 1.0 Conservation of Resources
Sub-strand: 1.1 Soil Conservation Measures
Lesson focus: Meaning and importance of soil conservation

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Describe methods of soil conservation in an agricultural environment.
Skills: Carry out soil conservation activities in the environment.
Attitudes: Demonstrate a caring attitude towards soil in the environment.

Key Inquiry Question: How can we conserve soil in the agricultural environment?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Use tools and materials only under teacher supervision. Wear appropriate protective clothing, wash hands after practical work and avoid unsafe chemicals or contaminated materials.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

Teacher's remarks: _____

GRADE 8 AGRICULTURE – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 1

Week: 1 Lesson: 2 Date: _____ Time: _____ Roll: _____

Strand: 1.0 Conservation of Resources
Sub-strand: 1.1 Soil Conservation Measures
Lesson focus: Causes of soil erosion

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Describe methods of soil conservation in an agricultural environment.
Skills: Carry out soil conservation activities in the environment.
Attitudes: Demonstrate a caring attitude towards soil in the environment.

Key Inquiry Question: How can we conserve soil in the agricultural environment?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Follow teacher instructions, use materials responsibly and maintain a clean working environment.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

Teacher's remarks: _____

GRADE 8 AGRICULTURE – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 1

Week: 4 Lesson: 2 Date: _____ Time: _____ Roll: _____

Strand: 1.0 Conservation of Resources
Sub-strand: 1.2 Water Harvesting and Storage
Lesson focus: Water ponds

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Discuss ways of storing harvested water for domestic use.
Skills: Take part in harvesting and storing water in the school for domestic use.
Attitudes: Show responsibility in harvesting and storing water for domestic use.

Key Inquiry Question: How can we harvest and store water for domestic purposes?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Follow teacher instructions, use materials responsibly and maintain a clean working environment.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Use tools and materials only under teacher supervision. Wear appropriate protective clothing, wash hands after practical work and avoid unsafe chemicals or contaminated materials.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

Teacher's remarks: _____

GRADE 8 AGRICULTURE – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 1

Week: 7 Lesson: 3 Date: _____ Time: _____ Roll: _____

Strand: 2.0 Food Production Processes
Sub-strand: 2.1 Kitchen and Backyard Gardening
Lesson focus: Maintaining a kitchen or backyard garden

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Explain the role of kitchen and backyard gardens in food production.
Skills: Establish a kitchen and backyard garden for food production.
Attitudes: Adopt the use of kitchen and backyard gardens for food production.

Key Inquiry Question: How does a kitchen garden contribute to food production?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Use tools and materials only under teacher supervision. Wear appropriate protective clothing, wash hands after practical work and avoid unsafe chemicals or contaminated materials.

Strand: 2.0 Food Production Processes
Sub-strand: 2.2 Poultry Rearing in a Fold
Lesson focus: Meaning and features of a poultry fold

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Describe a fold in poultry rearing.
Skills: Construct a fold for rearing poultry.
Attitudes: Show responsibility in rearing poultry.

Key Inquiry Question: How can we rear poultry in a fold for food production?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

Lesson focus: Monitoring poultry and keeping simple records

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Describe a fold in poultry rearing.
Skills: Construct a fold for rearing poultry.
Attitudes: Show responsibility in rearing poultry.

Key Inquiry Question: How can we rear poultry in a fold for food production?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Practical handling of animals or animal products must be supervised by a competent adult. Observe handwashing, hygiene, animal welfare and food-safety procedures; do not use unsafe raw products.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

GRADE 8 AGRICULTURE – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 1

Week: 10 Lesson: 4 Date: _____ Time: _____ Roll: _____

Strand: 2.0 Food Production Processes
Sub-strand: 2.3 Crop Pest and Disease Control
Lesson focus: Common pests affecting vegetable crops

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Identify vegetable crops attacked by pests and diseases.
Skills: Control pests and diseases on vegetable crops.
Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.

Key Inquiry Question: How can we identify and control pests and diseases affecting vegetable crops?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.
