GRADE 8 AGRICULTURE – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 2

Week: 11 Lesson: 1 Date: _____ Time: _____ Roll: _____

Strand: 2.0 Food Production Processes
Sub-strand: 2.3 Crop Pest and Disease Control
Lesson focus: Signs of pest attack: punctured leaves, cut seedlings and curling leaves

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Identify vegetable crops attacked by pests and diseases.
Skills: Control pests and diseases on vegetable crops.
Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.

Key Inquiry Question: How can we identify and control pests and diseases affecting vegetable crops?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Use tools and materials only under teacher supervision. Wear appropriate protective clothing, wash hands after practical work and avoid unsafe chemicals or contaminated materials.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

Teacher's remarks: _____

Teacher's signature: _____ Date: _____

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 2

Week: 11 Lesson: 2 Date: _____ Time: _____ Roll: _____

Strand: 2.0 Food Production Processes
Sub-strand: 2.3 Crop Pest and Disease Control
Lesson focus: Common sites where crop pests are found

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Identify vegetable crops attacked by pests and diseases.
Skills: Control pests and diseases on vegetable crops.
Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.

Key Inquiry Question: How can we identify and control pests and diseases affecting vegetable crops?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Week: 13 Lesson: 2 Date: _____ Time: _____ Roll: _____

Strand: 2.0 Food Production Processes
Sub-strand: 2.4 Preparation of Animal Products
Lesson focus: Importance of processing fresh fish

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Explain the importance of processing fish and dressing poultry carcasses.
Skills: Process fresh fish for various purposes.
Attitudes: Uphold ethical and safety practices in preparation of animal products.

Key Inquiry Question: Why is it important to prepare animal products hygienically and safely?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Practical handling of animals or animal products must be supervised by a competent adult. Observe handwashing, hygiene, animal welfare and food-safety procedures; do not use unsafe raw products.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

Teacher's remarks: _____

GRADE 8 AGRICULTURE – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 2

Week: 14 Lesson: 2 Date: _____ Time: _____ Roll: _____

Strand: 2.0 Food Production Processes
Sub-strand: 2.4 Preparation of Animal Products
Lesson focus: Importance of dressing a poultry carcass

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Explain the importance of processing fish and dressing poultry carcasses.
Skills: Process fresh fish for various purposes.
Attitudes: Uphold ethical and safety practices in preparation of animal products.

Key Inquiry Question: Why is it important to prepare animal products hygienically and safely?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Practical handling of animals or animal products must be supervised by a competent adult. Observe handwashing, hygiene, animal welfare and food-safety procedures; do not use unsafe raw products.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Practical handling of animals or animal products must be supervised by a competent adult. Observe handwashing, hygiene, animal welfare and food-safety procedures; do not use unsafe raw products.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

Teacher's remarks: _____

Teacher's signature: _____ Date: _____

GRADE 8 AGRICULTURE – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 2

Week: 17 Lesson: 2 Date: _____ Time: _____ Roll: _____

Strand: 2.0 Food Production Processes
Sub-strand: 2.5 Preserving Animal Products
Lesson focus: Drying and smoking meat

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Explain the importance of preserving milk and meat at household level.
Skills: Preserve meat to prolong shelf life at household level.
Attitudes: Embrace the use of various methods to preserve animal products at household level.

Key Inquiry Question: How can we preserve milk and meat at household level?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Practical handling of animals or animal products must be supervised by a competent adult. Observe handwashing, hygiene, animal welfare and food-safety procedures; do not use unsafe raw products.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.

Activity 2 – Discuss and plan: In groups, learners discuss the focus, compare ideas and plan an appropriate task. The teacher guides learners to select suitable materials, tools and procedures, and checks understanding before practical work.

Activity 3 – Practise: Learners carry out the relevant investigation, demonstration, construction, garden activity, food preparation, observation or ICT task under appropriate supervision. They follow safety, hygiene and environmental-care practices.

Activity 4 – Share and improve: Groups present observations or products, explain decisions and receive feedback. Learners identify what worked, what needs improvement and how the learning can be applied in the home, school or community.

CONCLUSION AND ASSESSMENT

Revisit the key inquiry question and summarise the main learning. Assess through oral questions, observation, practical performance, checklist, written exercise, project record, peer/self-assessment or presentation. Give feedback and assign a suitable follow-up activity.

Assessment evidence: Learner explanations, accurate identification of concepts or materials, safe practical performance, group participation, completed product/record and ability to apply learning.

Safety / hygiene reminder: Follow teacher instructions, use materials responsibly and maintain a clean working environment.

Reflection / Self-remarks: What was achieved? Which learners need support or extension? Were resources and safety arrangements adequate? What should be improved next lesson?

Teacher's remarks: _____

GRADE 8 AGRICULTURE – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Agriculture Grade: 8 Year: 2027 Term: 2

Week: 20 Lesson: 3 Date: _____ Time: _____ Roll: _____

Strand: 3.0 Hygiene Practices
Sub-strand: 3.1 Cleaning the Kitchen
Lesson focus: Importance of kitchen cleanliness and hygiene

LESSON LEARNING OUTCOMES

At the end of the lesson, the learner should be able to:
Knowledge: Explain routine cleaning practices of a kitchen.
Skills: Carry out cleaning of a kitchen to maintain hygiene.
Attitudes: Appreciate the importance of a clean kitchen for healthy living.

Key Inquiry Question: How can daily, weekly and special cleaning enhance hygiene in the kitchen?

Learning Resources: KICD-approved Agriculture learner's materials; relevant pictures, charts and models; locally available materials; appropriate tools and equipment; school garden, demonstration area or digital resources where available.

Organisation of Learning: Whole-class discussion, pairs, small collaborative groups, supervised practical work and individual reflection. Provide inclusive roles and accessible alternatives.

INTRODUCTION

Review prior learning and introduce the lesson focus using a real object, picture, short scenario, question or demonstration. Elicit learners' experiences and introduce the key inquiry question.

LESSON DEVELOPMENT

Activity 1 – Explore: Learners observe, read or search relevant print and digital information about the lesson focus. They identify key terms, materials, processes or issues and record initial findings.
