GRADE 8 AGRICULTURE – SCHEME OF WORK

School: _____ Teacher: _____ TSC No.: _____

Grade: 8 Year: 2027 Term 2 Lessons per week: 4

Curriculum basis: KICD Grade 8 Agriculture Curriculum Design, Revised 2024. The design allocates 120 suggested lessons across four strands and thirteen sub-strands. This scheme uses a proposed 40-lessons-per-term distribution; KICD notes that suggested sub-strand lesson numbers may be adjusted to the learning context.

Learning outcomes are presented in Knowledge, Skills and Attitudes for planning. The lesson focuses and learning experiences are organised from the KICD sub-strand content and suggested experiences; consult the official design for full assessment rubrics, core competencies, values, PCIs and links to other learning areas.

WK	LSN	STRAND	SUB-STRAND / LESSON FOCUS	LESSON LEARNING OUTCOMES	LEARNING EXPERIENCES	KEY INQUIRY QUESTIONS	LEARNING RESOURCES	ASSESSMENT METHODS	REFLECTION
1	1	2.0 Food Production Processes	2.3 Crop Pest and Disease Control **Focus:** Signs of pest attack: punctured leaves, cut seedlings and curling leaves	At the end of the lesson, the learner should be able to: Knowledge: Identify vegetable crops attacked by pests and diseases. Skills: Control pests and diseases on vegetable crops. Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.	In groups, learners are guided to: take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations; visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting; and discuss and present the importance of pest and disease control. They then focus on signs of pest attack: punctured leaves, cut seedlings and curling leaves and share their findings.	How can we identify and control pests and diseases affecting vegetable crops?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
1	2	2.0 Food Production Processes	2.3 Crop Pest and Disease Control **Focus:** Common sites where crop pests are found	At the end of the lesson, the learner should be able to: Knowledge: Identify vegetable crops attacked by pests and diseases. Skills: Control pests and diseases on vegetable crops. Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.	In groups, learners are guided to: take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations; visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting; and discuss and present the importance of pest and disease control. They then focus on common sites where crop pests are found and share their findings.	How can we identify and control pests and diseases affecting vegetable crops?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
1	3	2.0 Food Production Processes	2.3 Crop Pest and Disease Control **Focus:** Common signs of crop diseases: wilting, spots and rotting	At the end of the lesson, the learner should be able to: Knowledge: Identify vegetable crops attacked by pests and diseases. Skills: Control pests and diseases on vegetable crops. Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.	In groups, learners are guided to: take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations; visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting; and discuss and present the importance of pest and disease control. They then focus on common signs of crop diseases: wilting, spots and rotting and share their findings.	How can we identify and control pests and diseases affecting vegetable crops?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
1	4	2.0 Food Production Processes	2.3 Crop Pest and Disease Control **Focus:** Field observation and identification of affected crops	At the end of the lesson, the learner should be able to: Knowledge: Identify vegetable crops attacked by pests and diseases. Skills: Control pests and diseases on vegetable crops. Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.	In groups, learners are guided to: take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations; visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting; and discuss and present the importance of pest and disease control. They then focus on field observation and identification of affected crops and share their findings.	How can we identify and control pests and diseases affecting vegetable crops?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
2	1	2.0 Food Production Processes	2.3 Crop Pest and Disease Control **Focus:** Handpicking pests	At the end of the lesson, the learner should be able to: Knowledge: Identify vegetable crops attacked by pests and diseases. Skills: Control pests and diseases on vegetable crops. Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.	In groups, learners are guided to: take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations; visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting; and discuss and present the importance of pest and disease control. They then focus on handpicking pests and share their findings.	How can we identify and control pests and diseases affecting vegetable crops?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
2	2	2.0 Food Production Processes	2.3 Crop Pest and Disease Control **Focus:** Removing affected crop parts	At the end of the lesson, the learner should be able to: Knowledge: Identify vegetable crops attacked by pests and diseases. Skills: Control pests and diseases on vegetable crops. Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.	In groups, learners are guided to: take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations; visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting; and discuss and present the importance of pest and disease control. They then focus on removing affected crop parts and share their findings.	How can we identify and control pests and diseases affecting vegetable crops?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
2	3	2.0 Food Production Processes	2.3 Crop Pest and Disease Control **Focus:** Uprooting heavily affected crops	At the end of the lesson, the learner should be able to: Knowledge: Identify vegetable crops attacked by pests and diseases. Skills: Control pests and diseases on vegetable crops. Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.	In groups, learners are guided to: take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations; visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting; and discuss and present the importance of pest and disease control. They then focus on uprooting heavily affected crops and share their findings.	How can we identify and control pests and diseases affecting vegetable crops?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____

WK	LSN	STRAND	SUB-STRAND / LESSON FOCUS	LESSON LEARNING OUTCOMES	LEARNING EXPERIENCES	KEY INQUIRY QUESTIONS	LEARNING RESOURCES	ASSESSMENT METHODS	REFLECTION
2	4	2.0 Food Production Processes	2.3 Crop Pest and Disease Control **Focus:** Using natural pesticides such as ash safely	At the end of the lesson, the learner should be able to: Knowledge: Identify vegetable crops attacked by pests and diseases. Skills: Control pests and diseases on vegetable crops. Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.	In groups, learners are guided to: take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations; visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting; and discuss and present the importance of pest and disease control. They then focus on using natural pesticides such as ash safely and share their findings.	How can we identify and control pests and diseases affecting vegetable crops?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
3	1	2.0 Food Production Processes	2.3 Crop Pest and Disease Control **Focus:** Importance of controlling pests and diseases in vegetable production	At the end of the lesson, the learner should be able to: Knowledge: Identify vegetable crops attacked by pests and diseases. Skills: Control pests and diseases on vegetable crops. Attitudes: Acknowledge the importance of controlling pests and diseases in vegetable production.	In groups, learners are guided to: take a field excursion to observe vegetable crops attacked by pests and identify signs and pest locations; visit a vegetable garden to observe disease symptoms such as wilting, black and brown spots and rotting; and discuss and present the importance of pest and disease control. They then focus on importance of controlling pests and diseases in vegetable production and share their findings.	How can we identify and control pests and diseases affecting vegetable crops?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
3	2	2.0 Food Production Processes	2.4 Preparation of Animal Products **Focus:** Importance of processing fresh fish	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of processing fish and dressing poultry carcasses. Skills: Process fresh fish for various purposes. Attitudes: Uphold ethical and safety practices in preparation of animal products.	In groups, learners are guided to: search for information on the importance of processing fish and dressing poultry carcasses; observe demonstrations or approved video resources on fish processing and poultry dressing; and discuss ethical considerations and safe handling of animal products. They then focus on importance of processing fresh fish and share their findings.	Why is it important to prepare animal products hygienically and safely?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
3	3	2.0 Food Production Processes	2.4 Preparation of Animal Products **Focus:** Preparation and cleaning of fresh fish	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of processing fish and dressing poultry carcasses. Skills: Process fresh fish for various purposes. Attitudes: Uphold ethical and safety practices in preparation of animal products.	In groups, learners are guided to: search for information on the importance of processing fish and dressing poultry carcasses; observe demonstrations or approved video resources on fish processing and poultry dressing; and discuss ethical considerations and safe handling of animal products. They then focus on preparation and cleaning of fresh fish and share their findings.	Why is it important to prepare animal products hygienically and safely?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
3	4	2.0 Food Production Processes	2.4 Preparation of Animal Products **Focus:** Processing fish for different purposes	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of processing fish and dressing poultry carcasses. Skills: Process fresh fish for various purposes. Attitudes: Uphold ethical and safety practices in preparation of animal products.	In groups, learners are guided to: search for information on the importance of processing fish and dressing poultry carcasses; observe demonstrations or approved video resources on fish processing and poultry dressing; and discuss ethical considerations and safe handling of animal products. They then focus on processing fish for different purposes and share their findings.	Why is it important to prepare animal products hygienically and safely?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
4	1	2.0 Food Production Processes	2.4 Preparation of Animal Products **Focus:** Food hygiene and safety when handling fish	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of processing fish and dressing poultry carcasses. Skills: Process fresh fish for various purposes. Attitudes: Uphold ethical and safety practices in preparation of animal products.	In groups, learners are guided to: search for information on the importance of processing fish and dressing poultry carcasses; observe demonstrations or approved video resources on fish processing and poultry dressing; and discuss ethical considerations and safe handling of animal products. They then focus on food hygiene and safety when handling fish and share their findings.	Why is it important to prepare animal products hygienically and safely?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
4	2	2.0 Food Production Processes	2.4 Preparation of Animal Products **Focus:** Importance of dressing a poultry carcass	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of processing fish and dressing poultry carcasses. Skills: Process fresh fish for various purposes. Attitudes: Uphold ethical and safety practices in preparation of animal products.	In groups, learners are guided to: search for information on the importance of processing fish and dressing poultry carcasses; observe demonstrations or approved video resources on fish processing and poultry dressing; and discuss ethical considerations and safe handling of animal products. They then focus on importance of dressing a poultry carcass and share their findings.	Why is it important to prepare animal products hygienically and safely?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
4	3	2.0 Food Production Processes	2.4 Preparation of Animal Products **Focus:** Safe and hygienic poultry carcass dressing	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of processing fish and dressing poultry carcasses. Skills: Process fresh fish for various purposes. Attitudes: Uphold ethical and safety practices in preparation of animal products.	In groups, learners are guided to: search for information on the importance of processing fish and dressing poultry carcasses; observe demonstrations or approved video resources on fish processing and poultry dressing; and discuss ethical considerations and safe handling of animal products. They then focus on safe and hygienic poultry carcass dressing and share their findings.	Why is it important to prepare animal products hygienically and safely?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
4	4	2.0 Food Production Processes	2.4 Preparation of Animal Products **Focus:** Tools and equipment used in preparation	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of processing fish and dressing poultry carcasses. Skills: Process fresh fish for various purposes. Attitudes: Uphold ethical and safety practices in preparation of animal products.	In groups, learners are guided to: search for information on the importance of processing fish and dressing poultry carcasses; observe demonstrations or approved video resources on fish processing and poultry dressing; and discuss ethical considerations and safe handling of animal products. They then focus on tools and equipment used in preparation and share their findings.	Why is it important to prepare animal products hygienically and safely?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____

5	1	2.0 Food Production Processes	2.4 Preparation of Animal Products **Focus:** Ethical practices in preparing animal products	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of processing fish and dressing poultry carcasses. Skills: Process fresh fish for various purposes. Attitudes: Uphold ethical and safety practices in preparation of animal products.	In groups, learners are guided to: search for information on the importance of processing fish and dressing poultry carcasses; observe demonstrations or approved video resources on fish processing and poultry dressing; and discuss ethical considerations and safe handling of animal products. They then focus on ethical practices in preparing animal products and share their findings.	Why is it important to prepare animal products hygienically and safely?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
5	2	2.0 Food Production Processes	2.4 Preparation of Animal Products **Focus:** Presenting processed animal products for use	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of processing fish and dressing poultry carcasses. Skills: Process fresh fish for various purposes. Attitudes: Uphold ethical and safety practices in preparation of animal products.	In groups, learners are guided to: search for information on the importance of processing fish and dressing poultry carcasses; observe demonstrations or approved video resources on fish processing and poultry dressing; and discuss ethical considerations and safe handling of animal products. They then focus on presenting processed animal products for use and share their findings.	Why is it important to prepare animal products hygienically and safely?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
5	3	2.0 Food Production Processes	2.5 Preserving Animal Products **Focus:** Importance of preserving milk and meat at household level	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of preserving milk and meat at household level. Skills: Preserve meat to prolong shelf life at household level. Attitudes: Embrace the use of various methods to preserve animal products at household level.	In groups, learners are guided to: search digital and print resources and share experiences on the importance of preserving milk and meat; preserve milk through boiling, fermenting and home cooling techniques; and make presentations promoting applicable household methods of preserving animal products. They then focus on importance of preserving milk and meat at household level and share their findings.	How can we preserve milk and meat at household level?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
5	4	2.0 Food Production Processes	2.5 Preserving Animal Products **Focus:** Hygienic handling of milk and meat	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of preserving milk and meat at household level. Skills: Preserve meat to prolong shelf life at household level. Attitudes: Embrace the use of various methods to preserve animal products at household level.	In groups, learners are guided to: search digital and print resources and share experiences on the importance of preserving milk and meat; preserve milk through boiling, fermenting and home cooling techniques; and make presentations promoting applicable household methods of preserving animal products. They then focus on hygienic handling of milk and meat and share their findings.	How can we preserve milk and meat at household level?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
6	1	2.0 Food Production Processes	2.5 Preserving Animal Products **Focus:** Boiling milk	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of preserving milk and meat at household level. Skills: Preserve meat to prolong shelf life at household level. Attitudes: Embrace the use of various methods to preserve animal products at household level.	In groups, learners are guided to: search digital and print resources and share experiences on the importance of preserving milk and meat; preserve milk through boiling, fermenting and home cooling techniques; and make presentations promoting applicable household methods of preserving animal products. They then focus on boiling milk and share their findings.	How can we preserve milk and meat at household level?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
6	2	2.0 Food Production Processes	2.5 Preserving Animal Products **Focus:** Fermenting milk	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of preserving milk and meat at household level. Skills: Preserve meat to prolong shelf life at household level. Attitudes: Embrace the use of various methods to preserve animal products at household level.	In groups, learners are guided to: search digital and print resources and share experiences on the importance of preserving milk and meat; preserve milk through boiling, fermenting and home cooling techniques; and make presentations promoting applicable household methods of preserving animal products. They then focus on fermenting milk and share their findings.	How can we preserve milk and meat at household level?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
6	3	2.0 Food Production Processes	2.5 Preserving Animal Products **Focus:** Home cooling techniques for milk	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of preserving milk and meat at household level. Skills: Preserve meat to prolong shelf life at household level. Attitudes: Embrace the use of various methods to preserve animal products at household level.	In groups, learners are guided to: search digital and print resources and share experiences on the importance of preserving milk and meat; preserve milk through boiling, fermenting and home cooling techniques; and make presentations promoting applicable household methods of preserving animal products. They then focus on home cooling techniques for milk and share their findings.	How can we preserve milk and meat at household level?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
6	4	2.0 Food Production Processes	2.5 Preserving Animal Products **Focus:** Salting meat	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of preserving milk and meat at household level. Skills: Preserve meat to prolong shelf life at household level. Attitudes: Embrace the use of various methods to preserve animal products at household level.	In groups, learners are guided to: search digital and print resources and share experiences on the importance of preserving milk and meat; preserve milk through boiling, fermenting and home cooling techniques; and make presentations promoting applicable household methods of preserving animal products. They then focus on salting meat and share their findings.	How can we preserve milk and meat at household level?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
7	1	2.0 Food Production Processes	2.5 Preserving Animal Products **Focus:** Boiling meat for preservation	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of preserving milk and meat at household level. Skills: Preserve meat to prolong shelf life at household level. Attitudes: Embrace the use of various methods to preserve animal products at household level.	In groups, learners are guided to: search digital and print resources and share experiences on the importance of preserving milk and meat; preserve milk through boiling, fermenting and home cooling techniques; and make presentations promoting applicable household methods of preserving animal products. They then focus on boiling meat for preservation and share their findings.	How can we preserve milk and meat at household level?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____

7	2	2.0 Food Production Processes	2.5 Preserving Animal Products **Focus:** Drying and smoking meat	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of preserving milk and meat at household level. Skills: Preserve meat to prolong shelf life at household level. Attitudes: Embrace the use of various methods to preserve animal products at household level.	In groups, learners are guided to: search digital and print resources and share experiences on the importance of preserving milk and meat; preserve milk through boiling, fermenting and home cooling techniques; and make presentations promoting applicable household methods of preserving animal products. They then focus on drying and smoking meat and share their findings.	How can we preserve milk and meat at household level?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
7	3	2.0 Food Production Processes	2.5 Preserving Animal Products **Focus:** Presenting suitable household preservation methods	At the end of the lesson, the learner should be able to: Knowledge: Explain the importance of preserving milk and meat at household level. Skills: Preserve meat to prolong shelf life at household level. Attitudes: Embrace the use of various methods to preserve animal products at household level.	In groups, learners are guided to: search digital and print resources and share experiences on the importance of preserving milk and meat; preserve milk through boiling, fermenting and home cooling techniques; and make presentations promoting applicable household methods of preserving animal products. They then focus on presenting suitable household preservation methods and share their findings.	How can we preserve milk and meat at household level?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
7	4	2.0 Food Production Processes	2.6 Cooking: Preparing a Balanced Meal **Focus:** Meaning and components of a balanced meal	At the end of the lesson, the learner should be able to: Knowledge: Explain factors to consider in preparing a balanced meal. Skills: Prepare a balanced meal for healthy living. Attitudes: Adopt the use of a balanced meal in day-to-day life.	In groups, learners are guided to: discuss factors to consider when preparing a balanced meal, including age, health status, occasion and gender; plan and cook a balanced meal containing proteins, carbohydrates, vitamins and minerals; and make menus for balanced meals and present them in class. They then focus on meaning and components of a balanced meal and share their findings.	How can we prepare a balanced meal for healthy living?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
8	1	2.0 Food Production Processes	2.6 Cooking: Preparing a Balanced Meal **Focus:** Factors considered when planning meals: age, health status, occasion and gender	At the end of the lesson, the learner should be able to: Knowledge: Explain factors to consider in preparing a balanced meal. Skills: Prepare a balanced meal for healthy living. Attitudes: Adopt the use of a balanced meal in day-to-day life.	In groups, learners are guided to: discuss factors to consider when preparing a balanced meal, including age, health status, occasion and gender; plan and cook a balanced meal containing proteins, carbohydrates, vitamins and minerals; and make menus for balanced meals and present them in class. They then focus on factors considered when planning meals: age, health status, occasion and gender and share their findings.	How can we prepare a balanced meal for healthy living?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
8	2	2.0 Food Production Processes	2.6 Cooking: Preparing a Balanced Meal **Focus:** Selecting foods from food groups	At the end of the lesson, the learner should be able to: Knowledge: Explain factors to consider in preparing a balanced meal. Skills: Prepare a balanced meal for healthy living. Attitudes: Adopt the use of a balanced meal in day-to-day life.	In groups, learners are guided to: discuss factors to consider when preparing a balanced meal, including age, health status, occasion and gender; plan and cook a balanced meal containing proteins, carbohydrates, vitamins and minerals; and make menus for balanced meals and present them in class. They then focus on selecting foods from food groups and share their findings.	How can we prepare a balanced meal for healthy living?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
8	3	2.0 Food Production Processes	2.6 Cooking: Preparing a Balanced Meal **Focus:** Planning a balanced meal	At the end of the lesson, the learner should be able to: Knowledge: Explain factors to consider in preparing a balanced meal. Skills: Prepare a balanced meal for healthy living. Attitudes: Adopt the use of a balanced meal in day-to-day life.	In groups, learners are guided to: discuss factors to consider when preparing a balanced meal, including age, health status, occasion and gender; plan and cook a balanced meal containing proteins, carbohydrates, vitamins and minerals; and make menus for balanced meals and present them in class. They then focus on planning a balanced meal and share their findings.	How can we prepare a balanced meal for healthy living?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
8	4	2.0 Food Production Processes	2.6 Cooking: Preparing a Balanced Meal **Focus:** Preparing ingredients and observing hygiene	At the end of the lesson, the learner should be able to: Knowledge: Explain factors to consider in preparing a balanced meal. Skills: Prepare a balanced meal for healthy living. Attitudes: Adopt the use of a balanced meal in day-to-day life.	In groups, learners are guided to: discuss factors to consider when preparing a balanced meal, including age, health status, occasion and gender; plan and cook a balanced meal containing proteins, carbohydrates, vitamins and minerals; and make menus for balanced meals and present them in class. They then focus on preparing ingredients and observing hygiene and share their findings.	How can we prepare a balanced meal for healthy living?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
9	1	2.0 Food Production Processes	2.6 Cooking: Preparing a Balanced Meal **Focus:** Cooking foods containing proteins	At the end of the lesson, the learner should be able to: Knowledge: Explain factors to consider in preparing a balanced meal. Skills: Prepare a balanced meal for healthy living. Attitudes: Adopt the use of a balanced meal in day-to-day life.	In groups, learners are guided to: discuss factors to consider when preparing a balanced meal, including age, health status, occasion and gender; plan and cook a balanced meal containing proteins, carbohydrates, vitamins and minerals; and make menus for balanced meals and present them in class. They then focus on cooking foods containing proteins and share their findings.	How can we prepare a balanced meal for healthy living?	KICD-approved Agriculture learner's materials; locally available materials; relevant tools and equipment; pictures, charts and models; print and digital resources; school garden or demonstration area where available.	Oral questions; observation checklist; practical task; learner presentation; written exercise; peer/self-assessment; project record; rubric.	_____
9	2	2.0 Food Production Processes	2.6 Cooking: Preparing a Balanced Meal **Focus:** Cooking foods containing carbohydrates	At the end of the lesson, the learner should be able to: Knowledge: Explain factors to consider in preparing a balanced meal. Skills: Prepare a balanced meal for healthy living. Attitudes: Adopt the use of a balanced meal in day-to-day life.	In groups, learners are guided to: discuss factors to consider when preparing a balanced meal, including age, health status, occasion and gender; plan and cook a balanced meal containing proteins, carbohydrates, vitamins and minerals; and make menus for balanced meals and present them in class.
