GRADE 8 SOCIAL STUDIES – LESSON PLAN 1

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	1	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	1.0 Social Studies and Personal Management	Sub-strand	1.1 Self-Improvement

Lesson Focus: personality traits and self-understanding

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to personality traits and self-understanding.

• Skills: Identify, discuss, interpret or demonstrate understanding of personality traits and self-understanding using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of personality traits and self-understanding to responsible personal and community life.

Key Inquiry Question

Which animal best reflects your personal characteristics?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to personality traits and self-understanding. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on personality traits and self-understanding, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about personality traits and self-understanding. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Reflection / Self-Remarks

Were the learning outcomes achieved? _____
Evidence of learning: _____
Remedial / enrichment action: _____

Week	1	Lesson	2
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	1.0 Social Studies and Personal Management	Sub-strand	1.1 Self-Improvement

Lesson Focus: personal goals for social and career development

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to personal goals for social and career development.

• Skills: Identify, discuss, interpret or demonstrate understanding of personal goals for social and career development using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of personal goals for social and career development to responsible personal and community life.

Key Inquiry Question

Which animal best reflects your personal characteristics?

Remedial / enrichment action: _____

GRADE 8 SOCIAL STUDIES – LESSON PLAN 13

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	4	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	2.0 Community Service Learning	Sub-strand	2.1 Community Service Learning Project

Lesson Focus: organising resources and responsibilities

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to organising resources and responsibilities.

• Skills: Identify, discuss, interpret or demonstrate understanding of organising resources and responsibilities using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of organising resources and responsibilities to responsible personal and community life.

Key Inquiry Question

How does one determine gaps or needs in the community?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to organising resources and responsibilities. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on organising resources and responsibilities, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about organising resources and responsibilities. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Reflection / Self-Remarks

GRADE 8 SOCIAL STUDIES – LESSON PLAN 25

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	7	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	3.0 People and Relationships	Sub-strand	3.2 Early Civilisations: Asia and Europe

Lesson Focus: Swahili civilisation along the East African coast

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to Swahili civilisation along the East African coast.

• Skills: Identify, discuss, interpret or demonstrate understanding of Swahili civilisation along the East African coast using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of Swahili civilisation along the East African coast to responsible personal and community life.

Key Inquiry Question

Why is cultural heritage important to society?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to Swahili civilisation along the East African coast. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on Swahili civilisation along the East African coast, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about Swahili civilisation along the East African coast. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

GRADE 8 SOCIAL STUDIES – LESSON PLAN 37

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	10	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	3.0 People and Relationships	Sub-strand	3.4 Population Growth in Africa

Lesson Focus: causes of population growth

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to causes of population growth.

• Skills: Identify, discuss, interpret or demonstrate understanding of causes of population growth using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of causes of population growth to responsible personal and community life.

Key Inquiry Question

Why is it important to study demographic changes?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to causes of population growth. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on causes of population growth, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about causes of population growth. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Reflection / Self-Remarks

Were the learning outcomes achieved? _____
Evidence of learning: _____
Remedial / enrichment action: _____

GRADE 8 SOCIAL STUDIES – LESSON PLAN 49

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	13	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	3.0 People and Relationships	Sub-strand	3.5 Diversity and Interpersonal Skills

Lesson Focus: positive and risky peer influence

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to positive and risky peer influence.

• Skills: Identify, discuss, interpret or demonstrate understanding of positive and risky peer influence using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of positive and risky peer influence to responsible personal and community life.

Key Inquiry Question

How can we demonstrate respect and appreciation of socio-cultural diversity and inclusion?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to positive and risky peer influence. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on positive and risky peer influence, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about positive and risky peer influence. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Reflection / Self-Remarks

Were the learning outcomes achieved? _____
Evidence of learning: _____
Remedial / enrichment action: _____

GRADE 8 SOCIAL STUDIES – LESSON PLAN 61

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	16	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	4.0 Natural and Historic Built Environments	Sub-strand	4.1 Map Reading and Interpretation

Lesson Focus: scale conversion

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to scale conversion.

• Skills: Identify, discuss, interpret or demonstrate understanding of scale conversion using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of scale conversion to responsible personal and community life.

Key Inquiry Question

How can critical thinking be used in map interpretation?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to scale conversion. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on scale conversion, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about scale conversion. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

GRADE 8 SOCIAL STUDIES – LESSON PLAN 73

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	19	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	4.0 Natural and Historic Built Environments	Sub-strand	4.2 Weather and Climate

Lesson Focus: desert and semi-desert climates

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to desert and semi-desert climates.

• Skills: Identify, discuss, interpret or demonstrate understanding of desert and semi-desert climates using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of desert and semi-desert climates to responsible personal and community life.

Key Inquiry Question

How does climate change affect human activities?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to desert and semi-desert climates. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on desert and semi-desert climates, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about desert and semi-desert climates. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

GRADE 8 SOCIAL STUDIES – LESSON PLAN 85

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	22	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	4.0 Natural and Historic Built Environments	Sub-strand	4.3 Vegetation in Africa

Lesson Focus: locating vegetation regions on a map

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to locating vegetation regions on a map.

• Skills: Identify, discuss, interpret or demonstrate understanding of locating vegetation regions on a map using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of locating vegetation regions on a map to responsible personal and community life.

Key Inquiry Question

Why should we care for vegetation in our environment?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to locating vegetation regions on a map. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on locating vegetation regions on a map, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about locating vegetation regions on a map. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

GRADE 8 SOCIAL STUDIES – LESSON PLAN 97

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	25	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	5.0 Political Developments and Governance	Sub-strand	5.1 The Constitution of Kenya

Lesson Focus: components of the Constitution of Kenya

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to components of the Constitution of Kenya.

• Skills: Identify, discuss, interpret or demonstrate understanding of components of the Constitution of Kenya using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of components of the Constitution of Kenya to responsible personal and community life.

Key Inquiry Question

Why is the Constitution important in governance?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to components of the Constitution of Kenya. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on components of the Constitution of Kenya, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about components of the Constitution of Kenya. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about role of families and communities in protecting rights. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Reflection / Self-Remarks

Remedial / enrichment action: _____

GRADE 8 SOCIAL STUDIES – LESSON PLAN 109

School: _____ Teacher: _____ TSC No.: _____

Learning Area	Social Studies	Grade	8
Year	2027	Term	Full Year
Week	28	Lesson	1
Date	_____	Time	_____
Roll	Present: _____ Absent: _____	Duration	40 minutes
Strand	5.0 Political Developments and Governance	Sub-strand	5.2 Human Rights

Lesson Focus: institutions and mechanisms for protection

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:

• Knowledge: Explain key concepts and facts related to institutions and mechanisms for protection.

• Skills: Identify, discuss, interpret or demonstrate understanding of institutions and mechanisms for protection using suitable Social Studies sources and activities.

• Attitudes: Appreciate the relevance of institutions and mechanisms for protection to responsible personal and community life.

Key Inquiry Question

How can we promote respect for children's rights in the community?

Learning Resources

KICD Grade 8 Social Studies curriculum design; approved Social Studies learner's book; relevant maps/atlas, charts, photographs, print and vetted digital sources; locally available materials.

Organisation of Learning

Learners work individually, in pairs and in small groups. Group roles are shared fairly; learners use accessible resources and report findings respectfully.

Lesson Development

Introduction (5 minutes)

Display a relevant picture, map, short scenario or guiding statement related to institutions and mechanisms for protection. Ask learners what they already know. Introduce the lesson focus and connect it to the key inquiry question.

Activity 1 – Explore (10 minutes)

In groups, learners are guided to examine the selected source on institutions and mechanisms for protection, identify key information and record unfamiliar terms or questions. The teacher supports learners to use evidence from the source.

Activity 2 – Discuss and investigate (10 minutes)

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about institutions and mechanisms for protection. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Learners discuss the main ideas, compare responses and use the approved text or other suitable resources to clarify important facts about review and reflection on citizenship. Groups organise findings in notes, a table, labelled sketch or concept map as appropriate.

Activity 3 – Apply and communicate (10 minutes)

Learners apply their understanding through a suitable task: map work, role-play, source interpretation, problem-solving, poster, project planning or short presentation, depending on the lesson focus. Groups share their findings.

Conclusion (5 minutes)

Learners summarise the main points, respond to the key inquiry question and state one way the learning relates to everyday life. The teacher corrects misconceptions and gives a short follow-up task.

Assessment Methods

Teacher observation; oral questions and responses; group discussion and presentation; learner notes; map/source/project task where relevant; short written exercise or exit ticket.

Differentiation and Support

Provide vocabulary support, visual prompts, guided questions and mixed-ability collaboration. Extend learning through independent research or a more challenging interpretation task. Ensure all learners can participate.

Reflection / Self-Remarks

Were the learning outcomes achieved? _____
Evidence of learning: _____
Remedial / enrichment action: _____
