GRADE 8 MATHEMATICS — RECORD OF WORK

TERM 1 | 2027 | SCHOOL-NEUTRAL CBC RECORD

School: _____	Teacher: _____	TSC No.: _____
Learning Area: Mathematics	Grade: 8	Term: Term 1

WK	LSN	DATE	STRAND	SUB-STRAND	WORK COVERED	SIGN
2	1	_____	Numbers	Integers - Identification of integers Integers - Representatio n of integers on number line	Covered Integers - Identification of integers Integers - Representatio n of integers on number line. Learners discussed and find readings of thermometers showing positive and negative values - classified numbers as integers or non-integers - used real-life situations like floors above and below ground to represent integers.	_____
2	2	_____	Numbers	Integers - Addition of integers on number line Integers - Subtraction of integers on number line	Covered Integers - Addition of integers on number line Integers - Subtraction of integers on number line. Learners used number cards and containers for selection - drew number lines on the ground - Jump to the right to add positive numbers - Mark and record positions after jumping.	_____
2	3	_____	Numbers	Integers - Combined operations on number line Integers - Application of integers using IT resources	Covered Integers - Combined operations on number line Integers - Application of integers using IT resources. Learners practised mixed operations using number lines - solved problems involving temperature changes - worked out problems involving floors in buildings.	_____
2	4	_____	Numbers	Fractions - Order of operations in fractions	Covered Fractions - Order of operations in fractions. Learners discussed and use correct order of operations in fractions - worked through operations in brackets first, then multiplication/ division, then addition/subtr action - Copy operations on number cards and solve.	_____
2	5	_____	Numbers	Fractions - Operations on fractions from shopping activities Fractions - Word problems involving fractions	Covered Fractions - Operations on fractions from shopping activities Fractions - Word problems involving fractions. Learners discussed and carry out operations on fractions from shopping and other real-life cases - Role- play shopping scenarios - solved problems involving sharing and distribution.	_____
3	1	_____	Numbers	Fractions - Games and IT activities on fractions	Covered Fractions - Games and IT activities on fractions. Learners Play games of operations on fractions using IT devices or other resources - Engage in drag and drop activities online - used fraction apps for practice.	_____
3	2	_____	Numbers	Fractions - Mixed practice on combined operations	Covered Fractions - Mixed practice on combined operations. Learners practised solving mixed fraction problems - worked in groups on challenging fraction tasks - presented solutions to the class.	_____
3	3	_____	Numbers	Fractions - Mixed practice on combined operations	Covered Fractions - Mixed practice on combined operations. Learners practised solving mixed fraction problems - worked in groups on challenging fraction tasks - presented solutions to the class.	_____
3	4	_____	Numbers	Fractions - Application and reflection	Covered Fractions - Application and reflection. Learners discussed with peers, parents or guardians about areas where fractions are applied - Share real-life experiences involving fractions - Compile a portfolio of fraction work.	_____
3	5	_____	Numbers	Decimals - Conversion of fractions to decimals	Covered Decimals - Conversion of fractions to decimals. Learners practised converting fractions to decimals using equivalent fractions with denominators as powers of 10 - used long division method to convert fractions - Complete conversion tables.	_____
4	1	_____	Numbers	Decimals - Identifying and converting recurring decimals	Covered Decimals - Identifying and converting recurring decimals. Learners discussed and classify non-recurring and recurring decimals - Indicate recurring digits using dot notation - practised converting recurring decimals to fractions using algebraic method.	_____
4	2	_____	Numbers	Decimals - Rounding off decimals to decimal places	Covered Decimals - Rounding off decimals to decimal places. Learners discussed and round off decimal numbers to required decimal places - practised rounding to 1, 2, 3 decimal places - used place value charts to understand rounding.	_____
4	3	_____	Numbers	Decimals - Expressing numbers in significant figures	Covered Decimals - Expressing numbers in significant figures. Learners Write decimal and whole numbers to given significant figures - discussed rules for identifying significant figures - practised expressing numbers to different significant figures.	_____

WK	LSN	DATE	STRAND	SUB-STRAND	WORK COVERED	SIGN
4	4	_____	Numbers	Decimals - Expressing numbers in standard form	Covered Decimals - Expressing numbers in standard form. Learners Write numbers in standard form on learning materials such as cards or charts - practised expressing very large and very small numbers - Understand the power of 10 notation.	_____
4	5	_____	Numbers	Decimals - Combined operations on decimals	Covered Decimals - Combined operations on decimals. Learners worked out combined operations on decimals in the correct order - practised problems involving brackets, multiplication, division, addition and subtraction - solved complex decimal calculations.	_____
5	1	_____	Numbers	Decimals - Application of decimals to real life	Covered Decimals - Application of decimals to real life. Learners discussed and apply decimals to real life cases - solved problems involving money, measurement s, temperature - worked with real-life scenarios.	_____
5	2	_____	Numbers	Decimals - Application of decimals to real life	Covered Decimals - Application of decimals to real life. Learners discussed and apply decimals to real life cases - solved problems involving money, measurement s, temperature - worked with real-life scenarios.	_____
5	3	_____	Numbers	Decimals - Games and digital activities	Covered Decimals - Games and digital activities. Learners Play games of operations on decimals using IT or other materials - used decimal apps and online games - Engage in interactive decimal activities.	_____
5	4	_____	Numbers	Squares and Square Roots - Reading squares from tables	Covered Squares and Square Roots - Reading squares from tables. Learners read and write the squares of numbers from tables - practised locating numbers in the table and reading their squares - worked through examples using Table 1.3.	_____
5	5	_____	Numbers	Squares and Square Roots - Squares of large numbers	Covered Squares and Square Roots - Squares of large numbers. Learners practised finding squares of numbers above 10 using standard form method - Convert numbers to standard form A × 10■ - calculated squares and express in ordinary form.	_____
6	1	_____	Numbers	Squares and Square Roots - Squares of numbers less than 1	Covered Squares and Square Roots - Squares of numbers less than 1. Learners practised finding squares of numbers less than 1 - used standard form with negative powers of 10 - applied systematic method for calculations.	_____
6	2	_____	Numbers	Squares and Square Roots - Reading square roots from tables	Covered Squares and Square Roots - Reading square roots from tables. Learners read and write the square roots of numbers from tables - practised using Table 1.4 for square roots - Add values from the ADD column correctly.	_____
6	3	_____	Numbers	Squares and Square Roots - Reading square roots from tables	Covered Squares and Square Roots - Reading square roots from tables. Learners read and write the square roots of numbers from tables - practised using Table 1.4 for square roots - Add values from the ADD column correctly.	_____
6	4	_____	Numbers	Squares and Square Roots - Square roots of large numbers	Covered Squares and Square Roots - Square roots of large numbers. Learners practised finding square roots of numbers above 100 - used standard form method - worked with both Table 1.4 and Table 1.5 appropriately.	_____
6	5	_____	Numbers	Squares and Square Roots - Using calculators for squares and square roots	Covered Squares and Square Roots - Using calculators for squares and square roots. Learners practised working out squares and square roots using a calculator - compared calculator results with table results - used IT devices or other materials to play square and square root games.	_____
7	1	_____	Numbers	Rates, Ratio, Proportions and Percentages - Identifying rates	Covered Rates, Ratio, Proportions and Percentages - Identifying rates. Learners Time while doing different activities such as calling using different mobile service providers - Role play activities and note time taken - recorded and compare rates.	_____
7	2	_____	Numbers	Rates, Ratio, Proportions and Percentages - Working out rates	Covered Rates, Ratio, Proportions and Percentages - Working out rates. Learners carried out activities to determine rates - calculated rates per unit time or quantity - solved rate problems from real-life contexts.	_____
7	3	_____	Numbers	Rates, Ratio, Proportions and Percentages - Expressing fractions as ratios	Covered Rates, Ratio, Proportions and Percentages - Expressing fractions as ratios. Learners used cut outs from whole objects to relate fractions to ratios - practised writing fractions as numerator : denominator - Simplify ratios to lowest terms.	_____

WK	LSN	DATE	STRAND	SUB-STRAND	WORK COVERED	SIGN
7	4	_____	Numbers	Rates, Ratio, Proportions and Percentages - Comparing ratios	Covered Rates, Ratio, Proportions and Percentages - Comparing ratios. Learners discussed and compare ratios from cut outs - used LCM method to compare ratios - Express ratios as percentages for easy comparison.	_____
7	5	_____	Numbers	Rates, Ratio, Proportions and Percentages - Comparing ratios	Covered Rates, Ratio, Proportions and Percentages - Comparing ratios. Learners discussed and compare ratios from cut outs - used LCM method to compare ratios - Express ratios as percentages for easy comparison.	_____
8	1	_____	Numbers	Rates, Ratio, Proportions and Percentages - Division of quantities in ratios	Covered Rates, Ratio, Proportions and Percentages - Division of quantities in ratios. Learners discussed and share quantities of concrete objects in different ratios - used counters or bottle tops to practice sharing - solved sharing problems.	_____
8	2	_____	Numbers	Rates, Ratio, Proportions and Percentages - Working out ratios	Covered Rates, Ratio, Proportions and Percentages - Working out ratios. Learners calculated ratios from given quantities - found missing values in ratio problems - applied ratios to real situations.	_____
8	3	_____	Numbers	Rates, Ratio, Proportions and Percentages - Increase and decrease using ratios	Covered Rates, Ratio, Proportions and Percentages - Increase and decrease using ratios. Learners discussed and determine increase and decrease using ratios - used the format new : old to express changes - solved problems involving ratio changes.	_____
8	4	_____	Numbers	Rates, Ratio, Proportions and Percentages - Percentage increase	Covered Rates, Ratio, Proportions and Percentages - Percentage increase. Learners discussed and determine percentage increase of different quantities - used the formula: percentage change = (change/origin al) × 100% - solved real-life percentage problems.	_____
8	5	_____	Numbers	Rates, Ratio, Proportions and Percentages - Percentage decrease	Covered Rates, Ratio, Proportions and Percentages - Percentage decrease. Learners worked through percentage decrease problems - calculated new values after percentage decrease - solved problems involving discounts and reductions.	_____
9	1	_____	Numbers	Rates, Ratio, Proportions and Percentages - Identifying direct proportions	Covered Rates, Ratio, Proportions and Percentages - Identifying direct proportions. Learners used IT devices or other materials to explore proportions - Role play shopping activities to show direct relationships - identified situations where increase in one leads to increase in other.	_____
9	2	_____	Numbers	Rates, Ratio, Proportions and Percentages - Working out direct proportions	Covered Rates, Ratio, Proportions and Percentages - Working out direct proportions. Learners Complete tables showing direct proportional relationships - calculated missing values in direct proportion - applied direct proportion to solve problems.	_____
9	3	_____	Numbers	Rates, Ratio, Proportions and Percentages - Working out direct proportions	Covered Rates, Ratio, Proportions and Percentages - Working out direct proportions. Learners Complete tables showing direct proportional relationships - calculated missing values in direct proportion - applied direct proportion to solve problems.	_____
9	4	_____	Numbers	Rates, Ratio, Proportions and Percentages - Identifying indirect proportions	Covered Rates, Ratio, Proportions and Percentages - Identifying indirect proportions. Learners used hourglass to show and determine indirect relationships - identified situations where increase in one leads to decrease in other - practised with filling containers.	_____
9	5	_____	Numbers	Rates, Ratio, Proportions and Percentages - Working out indirect proportions	Covered Rates, Ratio, Proportions and Percentages - Working out indirect proportions. Learners Complete tables showing indirect proportional relationships - calculated values where ratios are inverted - solved time- speed- distance problems.	_____
10	1	_____	Numbers	Rates, Ratio, Proportions and Percentages - Application and reflection	Covered Rates, Ratio, Proportions and Percentages - Application and reflection. Learners Watch videos on ratios and proportions as used in daily activities - discussed applications with parents or guardians - Reflect on learning and compile portfolio.	_____
10	2	_____	Algebra	Algebraic Expressions - Factorisation of algebraic expressions	Covered Algebraic Expressions - Factorisation of algebraic expressions. Learners made three sets of cards showing algebraic expressions and their factored forms - Match cards from different rows to form equations - discussed and identify common factors in terms - Write HCF in front of brackets and remaining factors inside.	_____

WK	LSN	DATE	STRAND	SUB-STRAND	WORK COVERED	SIGN
10	3	_____	Algebra	Algebraic Expressions - Identifying like and unlike terms in factorisation	Covered Algebraic Expressions - Identifying like and unlike terms in factorisation. Learners discussed and identify like and unlike terms - found common factors from given sets of algebraic terms - practised factorising expressions with numerical and variable common factors - worked in groups to factorise various expressions.	_____
10	4	_____	Algebra	Algebraic Expressions - Simplification of algebraic fractions	Covered Algebraic Expressions - Simplification of algebraic fractions. Learners discussed like and unlike terms in algebraic fractions - found LCM of denominators in algebraic fractions - Combine fractions with different denominators - practised simplifying complex algebraic fractions.	_____
10	5	_____	Algebra	Algebraic Expressions - Simplification of algebraic fractions	Covered Algebraic Expressions - Simplification of algebraic fractions. Learners discussed like and unlike terms in algebraic fractions - found LCM of denominators in algebraic fractions - Combine fractions with different denominators - practised simplifying complex algebraic fractions.	_____
11	1	_____	Algebra	Algebraic Expressions - Advanced simplification practice	Covered Algebraic Expressions - Advanced simplification practice. Learners practised writing fractions as single fractions - Simplify fractions with algebraic denominators - solved problems involving algebraic fractions - worked through real-life applications.	_____
11	2	_____	Algebra	Algebraic Expressions - Using IT devices and application	Covered Algebraic Expressions - Using IT devices and application. Learners used IT devices to work out exercises and activities in algebra - Engage in drag and drop activities of grouping similar terms - Play online games simplifying algebraic expressions - discussed applications with peers and parents.	_____
11	3	_____	Algebra	Linear Equations - Forming linear equations in two unknowns	Covered Linear Equations - Forming linear equations in two unknowns. Learners Put masses on beam balance and add marbles to balance - Give letters to represent unknowns - Role play shopping activities to form equations - Write equations from balancing scenarios.	_____
11	4	_____	Algebra	Linear Equations - More practice on forming equations	Covered Linear Equations - More practice on forming equations. Learners Write equations to represent ages, costs, and quantities - Form equations from perimeter problems - created equations from problems involving animals and farming - practised with two-digit number problems.	_____
11	5	_____	Algebra	Linear Equations - Solving by substitution method	Covered Linear Equations - Solving by substitution method. Learners Write equations from fruit vendor scenario - Name equations as (i) and (ii) - Write one variable in terms of another - Replace and simplify to find values of unknowns.	_____
12	1	_____	Algebra	Linear Equations - Advanced practice on substitution method	Covered Linear Equations - Advanced practice on substitution method. Learners practised solving equations with fractions using substitution - worked through problems involving costs and quantities - solved problems about carpentry and furniture making - applied substitution to number problems.	_____
12	2	_____	Algebra	Linear Equations - Advanced practice on substitution method	Covered Linear Equations - Advanced practice on substitution method. Learners practised solving equations with fractions using substitution - worked through problems involving costs and quantities - solved problems about carpentry and furniture making - applied substitution to number problems.	_____
12	3	_____	Algebra	Linear Equations - Solving by elimination method	Covered Linear Equations - Solving by elimination method. Learners Form equations from shopping scenarios (plates and cups) - Multiply equations to make coefficients equal - Subtract corresponding parts to eliminate one variable - solved for remaining variable and substitute back.	_____
12	4	_____	Algebra	Linear Equations - More practice on elimination method	Covered Linear Equations - More practice on elimination method. Learners practised solving equations involving bread and tea leaves - worked through problems with different coefficients - solved problems about costs of items - compared elimination and substitution methods.	_____
12	5	_____	Algebra	Linear Equations - Application in real-life situations	Covered Linear Equations - Application in real-life situations. Learners found sum and difference of two numbers using equations - solved problems about rectangular flower beds - worked out problems involving hiring labourers - applied equations to school fees and shopping scenarios - Watch videos on linear equations applications.	_____
