GRADE 8 MATHEMATICS — RECORD OF WORK

TERM 2 | 2027 | SCHOOL-NEUTRAL CBC RECORD

School: _____	Teacher: _____	TSC No.: _____
Learning Area: Mathematics	Grade: 8	Term: Term 2

WK	LSN	DATE	STRAND	SUB-STRAND	WORK COVERED	SIGN
2	1	_____	4.0: Geometry	4.3: Scale Drawing - Representatio n of length to given scale	Covered 4.3: Scale Drawing - Representatio n of length to given scale. Learners compared sizes of objects and their representation s - discussed need for scale in drawings - measured actual dimensions - Choose appropriate scale for representation s - calculated scale from given information - Express scale in different forms.	_____
2	2	_____	4.0: Geometry	4.3: Scale Drawing - Converting actual length to scale length	Covered 4.3: Scale Drawing - Converting actual length to scale length. Learners applied given scales to convert measurement s - Complete tables converting actual to scale lengths - calculated scale lengths using various scales - worked with different units - practised systematic conversions.	_____
2	3	_____	4.0: Geometry	4.3: Scale Drawing - Converting actual length to scale length	Covered 4.3: Scale Drawing - Converting actual length to scale length. Learners applied given scales to convert measurement s - Complete tables converting actual to scale lengths - calculated scale lengths using various scales - worked with different units - practised systematic conversions.	_____
2	4	_____	4.0: Geometry	4.3: Scale Drawing - Converting scale length to actual length	Covered 4.3: Scale Drawing - Converting scale length to actual length. Learners measured lengths on scale diagrams - used given scales to find actual lengths - calculated actual distances - worked with different unit conversions - practised reverse calculations.	_____
2	5	_____	4.0: Geometry	4.3: Scale Drawing - Interpreting linear scales in statement form	Covered 4.3: Scale Drawing - Interpreting linear scales in statement form. Learners Examine linear scales on maps and plans - measured length of scale markings - determined what distance each unit represents - practised with different linear scales - Express linear scales using words.	_____
3	1	_____	4.0: Geometry	4.3: Scale Drawing - Writing linear scales in statement form	Covered 4.3: Scale Drawing - Writing linear scales in statement form. Learners Express given scales in statement form - Write statements using proper format - practised with scales showing various divisions - Convert linear scales to statements - discussed advantages of statement form.	_____
3	2	_____	4.0: Geometry	4.3: Scale Drawing - Interpreting linear scales in ratio form	Covered 4.3: Scale Drawing - Interpreting linear scales in ratio form. Learners Convert scales ensuring same units - Express scales as ratios - practised unit conversions before writing ratios - worked with various scales - Understand ratios have no units.	_____
3	3	_____	4.0: Geometry	4.3: Scale Drawing - Interpreting linear scales in ratio form	Covered 4.3: Scale Drawing - Interpreting linear scales in ratio form. Learners Convert scales ensuring same units - Express scales as ratios - practised unit conversions before writing ratios - worked with various scales - Understand ratios have no units.	_____
3	4	_____	4.0: Geometry	4.3: Scale Drawing - Writing linear scales in ratio form	Covered 4.3: Scale Drawing - Writing linear scales in ratio form. Learners Complete tables converting statement to ratio form - Convert scales with various measurement s - Write map scales in ratio form - calculated ratios for different scenarios - practised systematic conversions.	_____
3	5	_____	4.0: Geometry	4.3: Scale Drawing - Converting scale from statement to ratio form	Covered 4.3: Scale Drawing - Converting scale from statement to ratio form. Learners Convert statement scales to ratio form - practised with different unit combinations - applied systematic conversion process - worked with plans and maps - Verify conversions.	_____
4	1	_____	4.0: Geometry	4.3: Scale Drawing - Converting scale from ratio to statement form	Covered 4.3: Scale Drawing - Converting scale from ratio to statement form. Learners Convert ratio scales to statement form - determined appropriate units for actual measurement s - Express scales clearly in words - practised with various ratio scales - Choose suitable units for statements.	_____
4	2	_____	4.0: Geometry	4.3: Scale Drawing - Converting scale from ratio to statement form	Covered 4.3: Scale Drawing - Converting scale from ratio to statement form. Learners Convert ratio scales to statement form - determined appropriate units for actual measurement s - Express scales clearly in words - practised with various ratio scales - Choose suitable units for statements.	_____

WK	LSN	DATE	STRAND	SUB-STRAND	WORK COVERED	SIGN
4	3	_____	4.0: Geometry	4.3: Scale Drawing - Making scale drawings with calculations	Covered 4.3: Scale Drawing - Making scale drawings with calculations. Learners calculated scale lengths before drawing - made accurate scale drawings of various shapes - applied appropriate scales - measured and verify dimensions - calculated areas from scale drawings.	_____
4	4	_____	4.0: Geometry	4.3: Scale Drawing - Scale drawings with distance calculations	Covered 4.3: Scale Drawing - Scale drawings with distance calculations. Learners made scale drawings involving multiple points - used suitable scales for given distances - measured lengths on scale drawings - calculated actual distances from drawings - applied geometric principles where needed - Verify measurement s.	_____
4	5	_____	4.0: Geometry	4.3: Scale Drawing - Using maps and demonstrating scale	Covered 4.3: Scale Drawing - Using maps and demonstrating scale. Learners Examine maps in atlas - identified and read map scales - measured distances between locations - calculated actual distances using scale - compared different maps with different scales - discussed map features.	_____
5	1	_____	4.0: Geometry	4.3: Scale Drawing - Application problems with scale	Covered 4.3: Scale Drawing - Application problems with scale. Learners solved problems involving height and scale - found scales used in given scenarios - calculated areas from scale diagrams - determined time and speed using map scales - worked with various measurement scenarios - applied multiple concepts together.	_____
5	2	_____	4.0: Geometry	4.3: Scale Drawing - Application problems with scale	Covered 4.3: Scale Drawing - Application problems with scale. Learners solved problems involving height and scale - found scales used in given scenarios - calculated areas from scale diagrams - determined time and speed using map scales - worked with various measurement scenarios - applied multiple concepts together.	_____
5	3	_____	4.0: Geometry	4.3: Scale Drawing - Using ICT for scale and maps	Covered 4.3: Scale Drawing - Using ICT for scale and maps. Learners Access digital maps on devices - used zoom function to change scale - observed how scale changes with zoom level - measured distances on digital maps - compared scale indicators on digital and paper maps - discussed advantages of digital tools.	_____
5	4	_____	4.0: Geometry	4.4: Common Solids - Identifying common solids from environment	Covered 4.4: Common Solids - Identifying common solids from environment. Learners Collect objects from environment - Group objects by shape categories - identified properties of each solid type - discussed examples in daily life - created display of classified solids.	_____
5	5	_____	4.0: Geometry	4.4: Common Solids - Properties of solids (faces, edges, vertices)	Covered 4.4: Common Solids - Properties of solids (faces, edges, vertices). Learners Examine labeled solids - Name all faces of solids - identified all edges - Locate all vertices - practised with different solids - recorded properties systematically.	_____
6	1	_____	4.0: Geometry	4.4: Common Solids - Sketching nets of cubes	Covered 4.4: Common Solids - Sketching nets of cubes. Learners Label cube vertices - Cut cube along specified edges - Lay out faces on flat surface - Sketch net showing all faces for closed cube - Sketch net showing appropriate faces for open cube - identified different possible net arrangements.	_____
6	2	_____	4.0: Geometry	4.4: Common Solids - Sketching nets of cubes	Covered 4.4: Common Solids - Sketching nets of cubes. Learners Label cube vertices - Cut cube along specified edges - Lay out faces on flat surface - Sketch net showing all faces for closed cube - Sketch net showing appropriate faces for open cube - identified different possible net arrangements.	_____
6	3	_____	4.0: Geometry	4.4: Common Solids - Sketching nets of cuboids	Covered 4.4: Common Solids - Sketching nets of cuboids. Learners Label cuboid vertices - Cut along specified edges - Spread faces on flat surface - Sketch net with all faces for closed cuboid - Sketch net with appropriate faces for open cuboid - identified pairs of equal faces.	_____
6	4	_____	4.0: Geometry	4.4: Common Solids - Sketching nets of cylinders	Covered 4.4: Common Solids - Sketching nets of cylinders. Learners Cut cylinder to remove bases - Cut along height to open curved surface - observed curved surface forms rectangle - Note rectangle dimensions relate to circumference - Sketch nets for closed and open cylinders - Label components.	_____
6	5	_____	4.0: Geometry	4.4: Common Solids - Sketching nets of pyramids	Covered 4.4: Common Solids - Sketching nets of pyramids. Learners Label pyramid vertices - Cut along slant edges - Lay faces on flat surface - Sketch net showing base and triangular faces - Ensure triangular faces connect to base edges - practised with different base dimensions.	_____
7	1	_____	4.0: Geometry	4.4: Common Solids - Sketching nets of cones	Covered 4.4: Common Solids - Sketching nets of cones. Learners Cut base from cone - Cut curved surface along slant height - observed curved surface forms sector - Note relationship between arc length and base circumference - Sketch net showing circle and sector - Label components.	_____

WK	LSN	DATE	STRAND	SUB-STRAND	WORK COVERED	SIGN
7	2	_____	4.0: Geometry	4.4: Common Solids - Sketching nets of cones	Covered 4.4: Common Solids - Sketching nets of cones. Learners Cut base from cone - Cut curved surface along slant height - observed curved surface forms sector - Note relationship between arc length and base circumference - Sketch net showing circle and sector - Label components.	_____
7	3	_____	4.0: Geometry	4.4: Common Solids - Matching solids to nets and vice versa	Covered 4.4: Common Solids - Matching solids to nets and vice versa. Learners Match various solids to their nets - identified which solid each net will form - drew solid that corresponds to given net - practised visualizing 3D from 2D - Sketch nets for solids with various dimensions.	_____
7	4	_____	4.0: Geometry	4.4: Common Solids - Surface area of cubes from nets	Covered 4.4: Common Solids - Surface area of cubes from nets. Learners measured sides of cube - Sketch net of cube - calculated area of one face - Multiply by number of faces - practised with cubes of different dimensions - Verify by drawing net and calculating.	_____
7	5	_____	4.0: Geometry	4.4: Common Solids - Surface area of cuboids from nets	Covered 4.4: Common Solids - Surface area of cuboids from nets. Learners drew net of cuboid with given dimensions - calculated areas of different faces - identified pairs of equal faces - Add all areas to find total - practised with various dimensions - Verify calculations.	_____
8	1	_____	4.0: Geometry	4.4: Common Solids - Surface area of cylinders from nets	Covered 4.4: Common Solids - Surface area of cylinders from nets. Learners identified net components - calculated area of circular faces - found rectangle dimensions using circumference - calculated rectangular area - Add areas for total surface area - practised with different dimensions.	_____
8	2	_____	4.0: Geometry	4.4: Common Solids - Surface area of cylinders from nets	Covered 4.4: Common Solids - Surface area of cylinders from nets. Learners identified net components - calculated area of circular faces - found rectangle dimensions using circumference - calculated rectangular area - Add areas for total surface area - practised with different dimensions.	_____
8	3	_____	4.0: Geometry	4.4: Common Solids - Surface area of pyramids from nets	Covered 4.4: Common Solids - Surface area of pyramids from nets. Learners drew net showing base and triangular faces - calculated base area - calculated area of each triangular face - Add base area to sum of triangular areas - practised with different dimensions - Verify calculations.	_____
8	4	_____	4.0: Geometry	4.4: Common Solids - Surface area of cones and distance on surfaces	Covered 4.4: Common Solids - Surface area of cones and distance on surfaces. Learners identified cone net components - calculated circular base area - calculated sector area using given angle - found total surface area - Open cuboid into net to find paths between points - measured distances along net surface.	_____
8	5	_____	4.0: Geometry	4.4: Common Solids - Surface area of cones and distance on surfaces	Covered 4.4: Common Solids - Surface area of cones and distance on surfaces. Learners identified cone net components - calculated circular base area - calculated sector area using given angle - found total surface area - Open cuboid into net to find paths between points - measured distances along net surface.	_____
9	1	_____	4.0: Geometry	4.4: Common Solids - Making models of hollow solids (cubes and cuboids)	Covered 4.4: Common Solids - Making models of hollow solids (cubes and cuboids). Learners drew nets accurately on manila paper - Include flaps for joining faces - Cut out nets carefully - Fold along marked lines - Paste flaps to form hollow solids - Display completed models.	_____
9	2	_____	4.0: Geometry	4.4: Common Solids - Making models of cylinders, cones and pyramids	Covered 4.4: Common Solids - Making models of cylinders, cones and pyramids. Learners drew cylinder net with calculated dimensions - constructed cone net with appropriate sector angle - drew pyramid net with correct measurement s - Cut and fold to form solids - Paste edges to complete models - Display and compare models.	_____
9	3	_____	4.0: Geometry	4.4: Common Solids - Using IT devices and drawing technology	Covered 4.4: Common Solids - Using IT devices and drawing technology. Learners Watch educational videos about solids - used software to draw 3D shapes - Explore rotating solids digitally - practised drawing nets using technology - used apps to visualize net folding - Share digital creations.	_____
9	4	_____	5.0: Data Handling and Probability	5.1: Data Presentation and Interpretation - Collecting data and drawing bar graphs	Covered 5.1: Data Presentation and Interpretation - Collecting data and drawing bar graphs. Learners Collect data from class members on given characteristics - Fill data in tables - Choose suitable scale for collected data - drew bar graphs to represent collected data - compared graphs with other groups - discussed components of bar graphs.	_____

WK	LSN	DATE	STRAND	SUB-STRAND	WORK COVERED	SIGN
9	5	_____	5.0: Data Handling and Probability	5.1: Data Presentation and Interpretation - Drawing bar graphs with suitable scale 5.1: Data Presentation and Interpretation - Interpreting bar graphs	Covered 5.1: Data Presentation and Interpretation - Drawing bar graphs with suitable scale 5.1: Data Presentation and Interpretation - Interpreting bar graphs. Learners Choose uniform width for bars - Select uniform gaps between bars - Choose suitable scale for vertical axis - calculated heights of bars according to scale - drew bars accurately - Label axes properly - practised with various data sets.	_____
10	1	_____	5.0: Data Handling and Probability	5.1: Data Presentation and Interpretation - Drawing line graphs	Covered 5.1: Data Presentation and Interpretation - Drawing line graphs. Learners Choose suitable scale for x-axis - Choose suitable scale for y-axis - Plot points from table of values - Join plotted points using straight lines - Label axes appropriately - practised drawing line graphs for different data sets.	_____
10	2	_____	5.0: Data Handling and Probability	5.1: Data Presentation and Interpretation - Interpreting line graphs 5.1: Data Presentation and Interpretation - Identifying mode of discrete data	Covered 5.1: Data Presentation and Interpretation - Interpreting line graphs 5.1: Data Presentation and Interpretation - Identifying mode of discrete data. Learners read values at specific points on graph - identified highest and lowest values - determined trends from line graphs - calculated totals from graph data - Answer questions based on line graphs - discussed patterns observed.	_____
10	3	_____	5.0: Data Handling and Probability	5.1: Data Presentation and Interpretation - Calculating mean of discrete data 5.1: Data Presentation and Interpretation - Working out averages from different sets	Covered 5.1: Data Presentation and Interpretation - Calculating mean of discrete data 5.1: Data Presentation and Interpretation - Working out averages from different sets. Learners Note down values from group members - Add all values in data set - Count number of values - Divide sum by number of values - calculated mean for various data sets - Verify calculations - practised with different contexts.	_____
10	4	_____	5.0: Data Handling and Probability	5.1: Data Presentation and Interpretation - Determining median of discrete data	Covered 5.1: Data Presentation and Interpretation - Determining median of discrete data. Learners Arrange data in ascending or descending order - identified middle value for odd sets - calculated median for even sets by averaging two middle values - practised finding median for various data sets - compared median with mode and mean - discussed applications.	_____
10	5	_____	5.0: Data Handling and Probability	5.1: Data Presentation and Interpretation - Using IT for data presentation and calculations	Covered 5.1: Data Presentation and Interpretation - Using IT for data presentation and calculations. Learners used spreadsheet software to enter data - created bar graphs using software - created line graphs using software - used formulas to calculate mean - used functions to find mode and median - compared manual and digital methods - presented findings digitally.	_____
11	1	_____	5.0: Data Handling and Probability	5.2: Probability - Identifying events involving chance in real life	Covered 5.2: Probability - Identifying events involving chance in real life. Learners discussed possibilities in various scenarios - identified chance events in sports - Recognize chance in weather predictions - discussed chance in games - List daily events involving chance - Share observations with class.	_____
11	2	_____	5.0: Data Handling and Probability	5.2: Probability - Identifying events involving chance in real life	Covered 5.2: Probability - Identifying events involving chance in real life. Learners discussed possibilities in various scenarios - identified chance events in sports - Recognize chance in weather predictions - discussed chance in games - List daily events involving chance - Share observations with class.	_____
11	3	_____	5.0: Data Handling and Probability	5.2: Probability - Discussing likely and unlikely events	Covered 5.2: Probability - Discussing likely and unlikely events. Learners Examine likelihood scale - discussed meaning of each term - classified statements using likelihood terms - identified impossible events - identified certain events - Distinguish between likely and unlikely - practised with various statements.	_____
11	4	_____	5.0: Data Handling and Probability	5.2: Probability - Performing chance experiments	Covered 5.2: Probability - Performing chance experiments. Learners Obtain coins and flip them - Toss dice and record outcomes - drew colored balls or beads from bags - used spinners and record results - recorded outcomes from experiments - compared results with other groups - discussed patterns observed.	_____
11	5	_____	5.0: Data Handling and	5.2: Probability - Writing experimental probability outcomes	Covered 5.2: Probability - Writing experimental probability outcomes. Learners List possible outcomes from coin toss - Write outcomes from die roll - determined outcomes from spinners - List outcomes from drawing objects - Form combinations of outcomes - recorded outcomes systematically - Share findings with class.	_____
12	1	_____	5.0: Data Handling and Probability	5.2: Probability - Expressing probability outcomes as fractions	Covered 5.2: Probability - Expressing probability outcomes as fractions. Learners identified total possible outcomes - identified favorable outcomes - Express probability as fraction of favorable to total outcomes - Simplify probability fractions - calculated probabilities from various scenarios - solved word problems involving probability - Verify answers.	_____

WK	LSN	DATE	STRAND	SUB-STRAND	WORK COVERED	SIGN
12	2	_____	5.0: Data Handling and Probability	5.2: Probability - Expressing probability outcomes as fractions	Covered 5.2: Probability - Expressing probability outcomes as fractions. Learners identified total possible outcomes - identified favorable outcomes - Express probability as fraction of favorable to total outcomes - Simplify probability fractions - calculated probabilities from various scenarios - solved word problems involving probability - Verify answers.	_____
12	3	_____	5.0: Data Handling and Probability	5.2: Probability - Expressing probability as decimals and percentages	Covered 5.2: Probability - Expressing probability as decimals and percentages. Learners Convert probability fractions to decimals - Convert probability fractions to percentages - Understand that probability in decimals cannot exceed 1 - Understand that probability in percentages cannot exceed 100% - calculated complementar y probabilities - solved problems in different forms - applied probability in real contexts.	_____
12	4	_____	5.0: Data Handling and Probability	5.2: Probability - Using IT to play probability games	Covered 5.2: Probability - Using IT to play probability games. Learners Access online probability games - used software to simulate coin flips - used apps to simulate dice rolls - Play digital probability games - recorded results from digital experiments - compared manual and digital experiments - discussed advantages of using technology.	_____
12	5	_____	5.0: Data Handling and Probability	5.2: Probability - Using IT to play probability games	Covered 5.2: Probability - Using IT to play probability games. Learners .	_____
