GRADE 8 PRE-TECHNICAL STUDIES – 2027 LESSON PLANS

Term 2 • 44 lesson plans • School-neutral teacher planning resource

GRADE 8 PRE-TECHNICAL STUDIES – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Pre-Technical Studies Grade: 8 Year: 2027 Term 2

Week: 1 Lesson: 1 Date: _____ Time: _____ Roll: _____

Strand: 2.0 Communication in Pre-Technical Studies
Sub-strand: 2.4 Visual Programming
Lesson focus: Uses of visual programming in daily life

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:
At the end of the lesson, the learner should be able to:
Knowledge: Explain key concepts related to uses of visual programming in daily life.
Skills: Value the importance of visual programming in day-to-day life.
Attitudes: Appreciate the importance of uses of visual programming in daily life in safe and responsible work.

Key Inquiry Question: How are computer programs used in day-to-day life?

Learning Resources: KICD curriculum design; approved Grade 8 learner's materials; charts, pictures or real objects; exercise books; and relevant tools, equipment, materials or digital devices, subject to availability and safety.

Organisation of Learning: Whole-class engagement, pairs and small groups; individual practice where appropriate. Ensure safe use of equipment and inclusive participation.

Introduction

The teacher displays or describes examples related to **uses of visual programming in daily life**, elicits learners' prior experiences and introduces the lesson focus. Learners share observations and agree on safe, respectful ways of participating.

Lesson Development

Activity 1: Learners observe, identify or discuss examples of uses of visual programming in daily life using locally available materials, illustrations or approved digital content.

Activity 2: In groups, learners investigate the focus through guided discussion, comparison, sorting, demonstration or information search, as appropriate to the topic.

Activity 3: Groups carry out a practical or applied task related to uses of visual programming in daily life. The teacher guides safe handling of tools, devices and materials wherever relevant.

Activity 4: Learners record findings, prepare a labelled sketch, chart, short explanation, demonstration or other suitable product, then present and receive peer feedback.

Assessment

The teacher assesses learners through observation, oral questions, review of written records and evaluation of the practical/group task. Learners use peer- and self-assessment to identify what they understood and what needs improvement.

Conclusion

Learners summarise the main ideas and explain one practical application of uses of visual programming in daily life. The teacher reinforces key safety, accuracy and responsible-use messages relevant to the lesson.

Reflection / Self-Remarks

What was achieved? _____
Challenges observed: _____
Remedial / enrichment action: _____

GRADE 8 PRE-TECHNICAL STUDIES – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Pre-Technical Studies Grade: 8 Year: 2027 Term 2

Week: 1 Lesson: 2 Date: _____ Time: _____ Roll: _____

Strand: 3.0 Materials for Production
Sub-strand: 3.1 Composite Materials
Lesson focus: Meaning and examples of composite materials

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:
At the end of the lesson, the learner should be able to:
Knowledge: Explain key concepts related to meaning and examples of composite materials.
Skills: Identify composite materials in the locality.
Attitudes: Appreciate the importance of meaning and examples of composite materials in safe and responsible work.

Key Inquiry Question: How can composite materials be identified? Why are they used in day-to-day life?

Learning Resources: KICD curriculum design; approved Grade 8 learner's materials; charts, pictures or real objects; exercise books; and relevant tools, equipment, materials or digital devices, subject to availability and safety.

Organisation of Learning: Whole-class engagement, pairs and small groups; individual practice where appropriate. Ensure safe use of equipment and inclusive participation.

Introduction

The teacher displays or describes examples related to **meaning and examples of composite materials**, elicits learners' prior experiences and introduces the lesson focus. Learners share observations and agree on safe, respectful ways of participating.

Lesson Development

Activity 1: Learners observe, identify or discuss examples of meaning and examples of composite materials using locally available materials, illustrations or approved digital content.

Activity 2: In groups, learners investigate the focus through guided discussion, comparison, sorting, demonstration or information search, as appropriate to the topic.

Activity 3: Groups carry out a practical or applied task related to meaning and examples of composite materials. The teacher guides safe handling of tools, devices and materials wherever relevant.

Activity 4: Learners record findings, prepare a labelled sketch, chart, short explanation, demonstration or other suitable product, then present and receive peer feedback.

Assessment

The teacher assesses learners through observation, oral questions, review of written records and evaluation of the practical/group task. Learners use peer- and self-assessment to identify what they understood and what needs improvement.

Conclusion

Learners summarise the main ideas and explain one practical application of meaning and examples of composite materials. The teacher reinforces key safety, accuracy and responsible-use messages relevant to the lesson.

Reflection / Self-Remarks

GRADE 8 PRE-TECHNICAL STUDIES – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Pre-Technical Studies Grade: 8 Year: 2027 Term 2

Week: 1 Lesson: 3 Date: _____ Time: _____ Roll: _____

Strand: 3.0 Materials for Production
Sub-strand: 3.1 Composite Materials
Lesson focus: Concrete, bricks and manufactured boards

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:
At the end of the lesson, the learner should be able to:
Knowledge: Explain key concepts related to concrete, bricks and manufactured boards.
Skills: Describe the composition of composite materials in the locality.
Attitudes: Appreciate the importance of concrete, bricks and manufactured boards in safe and responsible work.

Key Inquiry Question: How can composite materials be identified? Why are they used in day-to-day life?

Learning Resources: KICD curriculum design; approved Grade 8 learner's materials; charts, pictures or real objects; exercise books; and relevant tools, equipment, materials or digital devices, subject to availability and safety.

Organisation of Learning: Whole-class engagement, pairs and small groups; individual practice where appropriate. Ensure safe use of equipment and inclusive participation.

Introduction

The teacher displays or describes examples related to **concrete, bricks and manufactured boards**, elicits learners' prior experiences and introduces the lesson focus. Learners share observations and agree on safe, respectful ways of participating.

Lesson Development

Activity 1: Learners observe, identify or discuss examples of concrete, bricks and manufactured boards using locally available materials, illustrations or approved digital content.

Activity 2: In groups, learners investigate the focus through guided discussion, comparison, sorting, demonstration or information search, as appropriate to the topic.

Activity 3: Groups carry out a practical or applied task related to concrete, bricks and manufactured boards. The teacher guides safe handling of tools, devices and materials wherever relevant.

Activity 4: Learners record findings, prepare a labelled sketch, chart, short explanation, demonstration or other suitable product, then present and receive peer feedback.

Assessment

The teacher assesses learners through observation, oral questions, review of written records and evaluation of the practical/group task. Learners use peer- and self-assessment to identify what they understood and what needs improvement.

Conclusion

Learners summarise the main ideas and explain one practical application of concrete, bricks and manufactured boards. The teacher reinforces key safety, accuracy and responsible-use messages relevant to the lesson.

Remedial / enrichment action: _____

GRADE 8 PRE-TECHNICAL STUDIES – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Pre-Technical Studies Grade: 8 Year: 2027 Term 2

Week: 4 Lesson: 3 Date: _____ Time: _____ Roll: _____

Strand: 3.0 Materials for Production
Sub-strand: 3.2 Ceramics
Lesson focus: Care, safety and importance of ceramics

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:
At the end of the lesson, the learner should be able to:
Knowledge: Explain key concepts related to care, safety and importance of ceramics.
Skills: Appreciate the importance of ceramic materials.
Attitudes: Appreciate the importance of care, safety and importance of ceramics in safe and responsible work.

Key Inquiry Question: How are ceramic materials used in the work environment?

Learning Resources: KICD curriculum design; approved Grade 8 learner's materials; charts, pictures or real objects; exercise books; and relevant tools, equipment, materials or digital devices, subject to availability and safety.

Organisation of Learning: Whole-class engagement, pairs and small groups; individual practice where appropriate. Ensure safe use of equipment and inclusive participation.

Introduction

The teacher displays or describes examples related to **care, safety and importance of ceramics**, elicits learners' prior experiences and introduces the lesson focus. Learners share observations and agree on safe, respectful ways of participating.

Lesson Development

Activity 1: Learners observe, identify or discuss examples of care, safety and importance of ceramics using locally available materials, illustrations or approved digital content.

Activity 2: In groups, learners investigate the focus through guided discussion, comparison, sorting, demonstration or information search, as appropriate to the topic.

Activity 3: Groups carry out a practical or applied task related to care, safety and importance of ceramics. The teacher guides safe handling of tools, devices and materials wherever relevant.

Activity 4: Learners record findings, prepare a labelled sketch, chart, short explanation, demonstration or other suitable product, then present and receive peer feedback.

Assessment

The teacher assesses learners through observation, oral questions, review of written records and evaluation of the practical/group task. Learners use peer- and self-assessment to identify what they understood and what needs improvement.

Conclusion

Learners summarise the main ideas and explain one practical application of care, safety and importance of ceramics. The teacher reinforces key safety, accuracy and responsible-use messages relevant to the lesson.

Reflection / Self-Remarks

Remedial / enrichment action: _____

GRADE 8 PRE-TECHNICAL STUDIES – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Pre-Technical Studies Grade: 8 Year: 2027 Term 2

Week: 4 Lesson: 4 Date: _____ Time: _____ Roll: _____

Strand: 4.0 Tools and Production
Sub-strand: 4.1 Cutting Tools
Lesson focus: Meaning and purpose of cutting tools

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:
At the end of the lesson, the learner should be able to:
Knowledge: Explain key concepts related to meaning and purpose of cutting tools.
Skills: Identify cutting tools used in the work environment.
Attitudes: Appreciate the importance of meaning and purpose of cutting tools in safe and responsible work.

Key Inquiry Question: Why are cutting tools cared for?

Learning Resources: KICD curriculum design; approved Grade 8 learner's materials; charts, pictures or real objects; exercise books; and relevant tools, equipment, materials or digital devices, subject to availability and safety.

Organisation of Learning: Whole-class engagement, pairs and small groups; individual practice where appropriate. Ensure safe use of equipment and inclusive participation.

Introduction

The teacher displays or describes examples related to **meaning and purpose of cutting tools**, elicits learners' prior experiences and introduces the lesson focus. Learners share observations and agree on safe, respectful ways of participating.

Lesson Development

Activity 1: Learners observe, identify or discuss examples of meaning and purpose of cutting tools using locally available materials, illustrations or approved digital content.

Activity 2: In groups, learners investigate the focus through guided discussion, comparison, sorting, demonstration or information search, as appropriate to the topic.

Activity 3: Groups carry out a practical or applied task related to meaning and purpose of cutting tools. The teacher guides safe handling of tools, devices and materials wherever relevant.

Activity 4: Learners record findings, prepare a labelled sketch, chart, short explanation, demonstration or other suitable product, then present and receive peer feedback.

Assessment

The teacher assesses learners through observation, oral questions, review of written records and evaluation of the practical/group task. Learners use peer- and self-assessment to identify what they understood and what needs improvement.

Conclusion

Learners summarise the main ideas and explain one practical application of meaning and purpose of cutting tools. The teacher reinforces key safety, accuracy and responsible-use messages relevant to the lesson.

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Pre-Technical Studies Grade: 8 Year: 2027 Term 2

Week: 5 Lesson: 1 Date: _____ Time: _____ Roll: _____

Strand: 4.0 Tools and Production
Sub-strand: 4.1 Cutting Tools
Lesson focus: Identifying snips, chisels and handsaws

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:
At the end of the lesson, the learner should be able to:
Knowledge: Explain key concepts related to identifying snips, chisels and handsaws.
Skills: Select cutting tools for given tasks in a workplace.
Attitudes: Appreciate the importance of identifying snips, chisels and handsaws in safe and responsible work.

Key Inquiry Question: Why are cutting tools cared for?

Learning Resources: KICD curriculum design; approved Grade 8 learner's materials; charts, pictures or real objects; exercise books; and relevant tools, equipment, materials or digital devices, subject to availability and safety.

Organisation of Learning: Whole-class engagement, pairs and small groups; individual practice where appropriate. Ensure safe use of equipment and inclusive participation.

Introduction

The teacher displays or describes examples related to **identifying snips, chisels and handsaws**, elicits learners' prior experiences and introduces the lesson focus. Learners share observations and agree on safe, respectful ways of participating.

Lesson Development

Activity 1: Learners observe, identify or discuss examples of identifying snips, chisels and handsaws using locally available materials, illustrations or approved digital content.

Activity 2: In groups, learners investigate the focus through guided discussion, comparison, sorting, demonstration or information search, as appropriate to the topic.

Activity 3: Groups carry out a practical or applied task related to identifying snips, chisels and handsaws. The teacher guides safe handling of tools, devices and materials wherever relevant.

Activity 4: Learners record findings, prepare a labelled sketch, chart, short explanation, demonstration or other suitable product, then present and receive peer feedback.

Assessment

The teacher assesses learners through observation, oral questions, review of written records and evaluation of the practical/group task. Learners use peer- and self-assessment to identify what they understood and what needs improvement.

Conclusion

Learners summarise the main ideas and explain one practical application of identifying snips, chisels and handsaws. The teacher reinforces key safety, accuracy and responsible-use messages relevant to the lesson.

Knowledge: Explain key concepts related to matching tools to workplace tasks.
Skills: Recognise the importance of cutting tools in the work environment.
Attitudes: Appreciate the importance of matching tools to workplace tasks in safe and responsible work.

Key Inquiry Question: Why are cutting tools cared for?

Learning Resources: KICD curriculum design; approved Grade 8 learner's materials; charts, pictures or real objects; exercise books; and relevant tools, equipment, materials or digital devices, subject to availability and safety.

Organisation of Learning: Whole-class engagement, pairs and small groups; individual practice where appropriate. Ensure safe use of equipment and inclusive participation.

Introduction

The teacher displays or describes examples related to **matching tools to workplace tasks**, elicits learners' prior experiences and introduces the lesson focus. Learners share observations and agree on safe, respectful ways of participating.

Lesson Development

Activity 1: Learners observe, identify or discuss examples of matching tools to workplace tasks using locally available materials, illustrations or approved digital content.

Activity 2: In groups, learners investigate the focus through guided discussion, comparison, sorting, demonstration or information search, as appropriate to the topic.

Activity 3: Groups carry out a practical or applied task related to matching tools to workplace tasks. The teacher guides safe handling of tools, devices and materials wherever relevant.

Activity 4: Learners record findings, prepare a labelled sketch, chart, short explanation, demonstration or other suitable product, then present and receive peer feedback.

Assessment

The teacher assesses learners through observation, oral questions, review of written records and evaluation of the practical/group task. Learners use peer- and self-assessment to identify what they understood and what needs improvement.

Conclusion

Learners summarise the main ideas and explain one practical application of matching tools to workplace tasks. The teacher reinforces key safety, accuracy and responsible-use messages relevant to the lesson.

GRADE 8 PRE-TECHNICAL STUDIES – LESSON PLAN

School: _____ Teacher: _____ TSC No.: _____

Learning Area: Pre-Technical Studies Grade: 8 Year: 2027 Term 2

Week: 8 Lesson: 2 Date: _____ Time: _____ Roll: _____

Strand: 4.0 Tools and Production
Sub-strand: 4.1 Cutting Tools
Lesson focus: Review of safe use and care

Lesson Learning Outcomes

At the end of the lesson, the learner should be able to:
At the end of the lesson, the learner should be able to:
Knowledge: Explain key concepts related to review of safe use and care.
Skills: Recognise the importance of cutting tools in the work environment.
Attitudes: Appreciate the importance of review of safe use and care in safe and responsible work.

Key Inquiry Question: Why are cutting tools cared for?

Learning Resources: KICD curriculum design; approved Grade 8 learner's materials; charts, pictures or real objects; exercise books; and relevant tools, equipment, materials or digital devices, subject to availability and safety.

Organisation of Learning: Whole-class engagement, pairs and small groups; individual practice where appropriate. Ensure safe use of equipment and inclusive participation.

Introduction

The teacher displays or describes examples related to **review of safe use and care**, elicits learners' prior experiences and introduces the lesson focus. Learners share observations and agree on safe, respectful ways of participating.

Lesson Development

Activity 1: Learners observe, identify or discuss examples of review of safe use and care using locally available materials, illustrations or approved digital content.

Activity 2: In groups, learners investigate the focus through guided discussion, comparison, sorting, demonstration or information search, as appropriate to the topic.

Activity 3: Groups carry out a practical or applied task related to review of safe use and care. The teacher guides safe handling of tools, devices and materials wherever relevant.

Activity 4: Learners record findings, prepare a labelled sketch, chart, short explanation, demonstration or other suitable product, then present and receive peer feedback.

Assessment

The teacher assesses learners through observation, oral questions, review of written records and evaluation of the practical/group task. Learners use peer- and self-assessment to identify what they understood and what needs improvement.

Conclusion

Learners summarise the main ideas and explain one practical application of review of safe use and care. The teacher reinforces key safety, accuracy and responsible-use messages relevant to the lesson.

Activity 1: Learners observe, identify or discuss examples of balancing simple accounts using locally available materials, illustrations or approved digital content.

Activity 2: In groups, learners investigate the focus through guided discussion, comparison, sorting, demonstration or information search, as appropriate to the topic.

Activity 3: Groups carry out a practical or applied task related to balancing simple accounts. The teacher guides safe handling of tools, devices and materials wherever relevant.

Activity 4: Learners record findings, prepare a labelled sketch, chart, short explanation, demonstration or other suitable product, then present and receive peer feedback.

Assessment

The teacher assesses learners through observation, oral questions, review of written records and evaluation of the practical/group task. Learners use peer- and self-assessment to identify what they understood and what needs improvement.

Conclusion

Learners summarise the main ideas and explain one practical application of balancing simple accounts. The teacher reinforces key safety, accuracy and responsible-use messages relevant to the lesson.
